

ISAF CODE OF ENVIRONMENTALLY FRIENDLY BEHAVIOUR

Protect our Seas, Lakes and Waterways

Garbage

Do not throw garbage overboard. Secure all loose items onboard. Do not release poisonous or toxic waste (oil, paint, used batteries, cleaning agents, fuel) into the water.

Sewage

Use on-shore sanitary facilities when on port. Do not discharge sewage near beaches, bays and near shore-areas.

Wildlife

Do not feed or disturb wildlife. Maintain a distance of at least 300 to 500 meters from sea mammal and bird colonies.

Seabed

Avoid sailing into reed banks, reed beds, mangroves and any other areas of dense vegetation along the shoreline. Be careful when anchoring to minimize impact on seabed.

Environmentally friendly products

Use environmentally friendly products for cooking, cleaning, anti-fouling and maintenance. Buy local products on shore and support the sustainability of the places you visit.

Nature protected areas

Respect vulnerable and nature protected areas.

Information

Find out local environmental practices and respect the local environmental regulations.

Education

Educate your crew about the basic rules of protecting the environment while on the water.
