

## **ISAF Recognized Training Programme**

### **Recognition Kiteboarding**

A submission from the International Kiteboarding Association

#### **Proposal**

ISAF to Recognize National Kiteboard Training programmes through the ISAF Recognized Training accreditation inspections.

#### **Current Position**

Kiteboarding Training Programmes are currently not regulated.

#### **Reason**

By working with established IKA member National Kiteboarding Programmes, ISAF can help produce Training resources that would encourage new and existing members to apply international standards of best practice and help develop the sport. If these National Programmes were governed to the same standards as laid out in the existing ISAF Recognized Training accreditation guidelines, they should be just as eligible for applying for Inspection and recognition.
