

2024 Olympic Equipment

Olympic Equipment

A submission from the US Sailing

Purpose or Objective

To propose equipment criteria for the Mixed One-Person Event for the 2024 Olympic Games

Proposal

That equipment proposed for the mixed one-person be supplied equipment; and that it be trialled for use with multiple formats before selecting equipment for the event.

Current Position

None

Reasons

1. World Sailing decisions with respect to format for this event have not been made. There is the possibility that there could be more event opportunities to showcase the sport if the format is tied to the equipment selected, and there has not been time to evaluate all these opportunities.
 2. Provides equal opportunities for all Teams/sailors.
