

INTERNATIONAL ETHELLS CLASS ASSOCIATION

The following emergency class rules change has been approved to be effective 9th November 2006.

Amendment to class rule 2 - Protection of One-Design

“Tiller and tiller extension” is deleted from items which are not controlled.

The first sentence in class 2.1 is revised to say “The hull, keel, skeg, rudder, standing rigging, spars and sails are strictly controlled while the running rigging and associated fittings, lifting eyes are not controlled, except as specified in these rules.”

Amendment to class rule 4.5 - Spinnaker Boom

Replace the existing rule 4.5.1 with “The spinnaker boom spar shall be made of aluminium alloy.”

New Rule: 7.16 - Tiller and Tiller Extension (Prohibitions and Restrictions)

“The tiller shall be made of wood, aluminium alloy, steel, glass reinforced plastic or any combination of these materials. The tiller extension may be made of any material.”
