

Information about the LYS-system

The purpose of the LYS system is to give yachts of different classes the option to race against each other. The LYS number indicates what the “best” yacht of each respective kind is able to perform to. It is based on race statistics, which is a comparison between different types of yachts and experience.

The table is split in four groups, keelboats, sport boats, dinghies and multihull yachts.

The corrected times are normally calculated by simply multiplying the elapsed times by their respective LYS-figures.

The LYS-values are applied similarly in Sweden, Norway, Finland and Denmark.

Abbreviations

S	Spinnaker
G	Genoa
K	Jib ($FP < 1.1 \times FB$)
F	Solid propeller
V	Folding propeller
-	No equipment
MH	Masthead rig
Löa	Length over all
B	Beam
Dipl	Displacement
BL	Maximum length between the forestay and the extreme of the bowsprit
P	Mainsail hoist
E	Foot of mainsail
FL	Headsail luff length
AL	Leech length
FP	Luff Perpendicular
FB	Foretriangle base
FH	Foretriangle height
SL	Standing leech spinnaker
UL	Base leech
1/4BR	Quarter width
1/2BR	Half width
3/4BR	Three-quarter width
SPL	Spinnaker pole length

Further information is available from SSF, Sweden, www.ssf.se
