

**Application for International Class status**

Techno 293 Windsurfer Class

A submission from the International Formula Windsurfing Class

**Proposal:**

That the Techno 293 Class Association (T293) be designated as an ISAF International Class

**Current Position:**

The Techno 293 Class Association is currently an ISAF “Recognised” class.

**Reason:**

1. There is a need for an International Class to encourage the development of junior racing in support of all racing classes, including the Olympic Class.
2. There is need for separate world titles for boys and girls.
3. Over 2,400 boards have been distributed worldwide, to more than 20 countries representing 5 continents; at least 8 countries have 50 or more active “racers “.
