

**REPORTING COMMITTEE – WINDSURFING**

**OTHER COMMITTEE – SAILING**

**Manufacture of Windsurfing Equipment for the 2008 Olympic Regatta**

A submission from the IFWC, IMCO, MJOD, the International Raceboard Class, the Brazilian Sailing Federation and the International Funboard Class Association

**PROPOSAL:**

1. That ISAF may licence one or more producers to make the equipment selected for use in men's and women's windsurfing events at the 2008 Olympic Regatta;
2. That these producer(s) undertake to make the windsurfing equipment without placing any logos or marks upon it other than those licensed by ISAF;
3. That ISAF licence any commercial company to place their logo on the equipment selected for the 2008 Olympic Regatta windsurfing events and market / sell it worldwide using their own established distribution systems;
4. That the specified licence agreement shall state that no commercial logos shall appear on the equipment at the Olympic Regatta;
5. That the class logo shall be placed upon the sail according to the RRS.

**CURRENT POSITION:**

There is only one licensee allowed

**REASON:**

This will allow any commercial brand interested in the sport of windsurfing to become involved in the Olympic process whether it produces the equipment or not;

ISAF will be free to licence more than one producer;

No commercial logos will be seen on the windsurfing equipment in use at the Olympic Regatta.
