

Olympic Pathway-Windsurfing

Development of Youth and Junior Racing

A submission from the Chairman of the ISAF Windsurfing Committee

Proposal:

That the ISAF Council endorses a youth and junior structure for the development of windsurf racing, that supports Olympic Windsurfing.

Current Position:

No policy or structure currently exists.

Reason:

1. Many countries are looking for guidance in the selection of suitable equipment that will support their olympic windsurfing programme.
2. To ensure a co-ordinated network of “international” regattas at regional and continental level – essential for the long term development of elite racers.
3. To encourage and maintain a broad base for the sport of windsurf racing .
