The Equipment Rules of Sailing

C.4.2 Certification Control

A submission from the Chairman of the Equipment Committee

Purpose or Objective

To simplify the definition.

Proposal

C.4.2 Certification Control Measurement

Control for certification. The methods used as means of equipment control required by class rules or a certification authority which may include fundamental measurement for certification.

Current Position

As above.

Reason

“Fundamental measurement” is only one of many control methods that can be used at certification control.
