**Equipment Rules of Sailing**

**Rule C.4.2**

A submission from the Chairman of the Equipment Committee

**Purpose or Objective**

To correct an error in the definition of **Certification Control** from the previous edition.

**Proposal**

**C.4.2 Certification Measurement Control**

The methods used as means of equipment control required by **class rules**, or a **certification authority**, for certification.

**Current Position**

As above

**Reason**

The term Certification Measurement was not changed to Certification Control in the 2013-2016 ERS edition but is used elsewhere in the ERS. This submission corrects that definition.
