

Equipment Rules of Sailing

C.6.3(b) Measurement Trim

A submission from the Chairman of the Equipment Committee

Purpose or Objective

To have one single ERS definition for Measurement Trim.

Proposal

(b) MEASUREMENT TRIM

~~Measurement trim is~~ Trim achieved when ~~either, as specified in class rules,~~

- ~~(i)~~ two points on the **hull(s)** are at set distances perpendicular to a plane. The plane, the points and distances to be specified in **class rules**,

~~or~~

- ~~(ii) as determined by flotation with the boat in the condition as specified in class rules.~~

Current Position

As above.

Reason

1. Having two definitions for Measurement Trim is against the ERS aims and objectives and confusing. The second definition is vague and if a class wishes to use this then it is more appropriate to use their own definition of Measurement Trim within their class rules.
-
