The Equipment Rules of Sailing

G.1.4(m) Window

A submission from the Chairman of the Equipment Committee

Purpose or Objective
Clarification.

Proposal

(m) WINDOW
A predominantly transparent ply covering a sail opening in the body of a sail.

Current Position
As above.

Reasons
To clarify that ply used for a see through area in the body of the sail does not have to be entirely transparent but for example contain a grid of reinforcement threads.

This submission is intended to replace Submission 085-10 that was deferred by Council in 2010.
