**The Equipment Rules of Sailing**

G.1.4(m) Window

A submission from the Chairman of the Equipment Committee

**Proposal**

Amend as follows:

G.1.4 Sail Construction

(m) WINDOW

Transparent ply covering a sail opening in the body of the sail of an opaque sail.

**Current Position**

As above.

**Reason**

A window definition is only meaningful when a see through area constitutes something that is an exception to what is permitted elsewhere in the body of the sail as regulated by class rules.
