The Equipment Rules of Sailing

C.6.4 Batten Pocket Patch

A submission from the Chairman of the Equipment Committee

Purpose or Objective

To make the “Batten Pocket Patch” definition include a patch at the outer end of a pocket too.

Proposal

G.6.4 Batten Pocket Patch

Secondary reinforcement at the inner end of a batten pocket.

Current Position

As above.

Reason

The current “Batten Pocket Patch” definition only define a patch at the inner and of a batten pocket and the amended wording would make the definition cover a patch at the outer end of a pocket, at a sail edge, too.
