The Equipment Rules of Sailing

H.1 CERTIFICATION CONTROL

A submission from the Chairman of the Equipment Committee

Proposal

Amend as follows:

**H.1.2** If an official measurer is in any doubt as to the application of, or compliance with, the class rules he shall consult the certification authority before signing a certification control form or attaching or applying a certification mark.

Current Position

As above.

Reason

To reflect actual practice. Certification marks may be stamped rather than “attached” for example, so the term “applying” is proposed.
