Designation as an International or Recognized Class

Regulation 26.2

A submission from the Chairman of the Oceanic and Offshore Committee

Proposal

Obtaining designation as an International or Recognized Class

26.2 To be designated as either an International or Recognized Class, a class shall be recommended for designation by the Equipment Committee, and for Offshore Racing Classes also by the Oceanic and Offshore Committee, to the Council and must receive a majority vote of the Council.

Current Position

26.2 To be designated as either an International or Recognized Class, a class shall be recommended for designation by the Equipment Committee to the Council and must receive a majority vote of the Council.

Reason

It is in the terms of reference of the Oceanic and Offshore Committee that the Committee make recommendations on applications for International or Recognised status by Offshore classes (Regulation 15.17.6(e)), yet this is not reflected in Regulation 26.2. The Equipment committee should continue to make a recommendation for Offshore classes as they consider other items of a technical nature such as class rules etc.
