**Introduction**

One Metre hulls, hull appendages, rigs and sails may be manufactured by any amateur or professional manufacturer without any requirement for a manufacturing license.

The rules in Part II and III are closed class rules which means that anything not specifically permitted is prohibited.

Owners and crews should be aware that compliance with rules in Section C is NOT checked as part of the certification process.

Rules regulating the use of equipment during a race are contained in Section C of these class rules, Part I of the ERS and in the Racing Rules of Sailing.

This introduction provides an informal background only and the International One Metre Class Rules proper begin on the next page.
PART I – ADMINISTRATION

Section A – General

A.1 LANGUAGE
A.1.1 The official language of the class is English and in case of dispute over translation the English text shall prevail.
A.1.2 The word “shall” is mandatory and the word “may” is permissive.

A.2 ABBREVIATIONS
A.2.1 ISAF International Sailing Federation
MNA ISAF Member National Authority
ICA International One Metre Class Association
NCA National Class Association
ERS Equipment Rules of Sailing
RRS Racing Rules of Sailing

A.3 AUTHORITIES AND RESPONSIBILITIES
A.3.1 The international authority of the class is the ISAF which shall co-operate with the ICA in all matters concerning these class rules.
A.3.2 No legal responsibility with respect to these class rules, or accuracy of measurement, rests with:
the ISAF
the MNA
the ICA
any NCA
the certification authority
an official measurer
No claim arising from these class rules can be entertained.
A.3.3 Notwithstanding anything contained herein, the certification authority has the authority to withdraw a certificate and shall do so on the request of the ISAF

A.4 ADMINISTRATION OF THE CLASS
A.4.1 The ISAF has delegated its administrative functions of the class to m MNAs. A
MNA may delegate part or all of its functions, as stated in these class rules, to an NCA.

A.4.2 If the MNA does not wish to administer the class, its administrative functions as stated in these class rules shall be carried out by the ICA which may delegate the administration to an NCA.

A.5 ISAF RULES
A.5.1 These class rules shall be read in conjunction with the ERS.
A.5.2 Except where used in headings, when a term is printed in “bold” the definition in the ERS applies and when a term is printed in “italics” the definition in the RRS applies.

A.6 CHAMPIONSHIP RULES
A.6.1 The Class Championship Rules shall apply at World and Continental Championships.

A.7 SAILING INSTRUCTIONS
A.7.1 These class rules shall not be varied by sailing instructions except as provided by A.7.2.
A.7.2 At World or Continental Championships the sailing instructions may vary these class rules only with the agreement of the ICA.

A.8 CLASS RULES AMENDMENTS
A.8.1 Amendments to these class rules shall be proposed by the ICA and are subject to the approval of ISAF.

A.9 CLASS RULES INTERPRETATIONS
A.9.1 GENERAL
Interpretation of class rules, except as provided by A.9.2, shall be made in accordance with the ISAF Regulations.
A.9.2 AT AN EVENT
Any interpretation of class rules required at an event may be made by an international jury constituted in accordance with the RRS. Such interpretation shall only be valid during the event and the organising authority shall, as soon as practical after the event, inform the ISAF, the MNA and the ICA.

A.10 HULL REGISTRATION NUMBER
A.10.1 Registration numbers shall be issued by the certification authority.
A.10.2 Registration numbers shall be issued in consecutive order starting at “1”.
A.10.3 Each hull shall have a unique registration number which shall include the national letters and the certification authority’s sequential registration
number. Under no circumstances may a registration number be used on a hull other than the hull on which it was first used.

A.11 CERTIFICATION

A.11.1 For a hull not previously certified, all items required by the measurement form(s) to be measured shall be measured by an official measurer and the details entered onto the form(s).

A.11.2 The measurement form(s), and certification fee if required, shall be sent to the certification authority in the country where the hull is to be registered within 4 weeks after completion of measurement.

A.11.3 Upon receipt of a satisfactorily completed measurement form(s) and certification fee if required within the 4 week time limit, the certification authority may issue a certificate.

A.11.4 The certification authority shall retain the original measurement form(s), which shall be transferred to the new certification authority upon request if the hull is exported.

A.12 VALIDITY OF CERTIFICATE

A.12.1 A certificate becomes invalid upon:
   (a) a change of ownership,
   (b) withdrawal by the certification authority,
   (c) the issue of another certificate.

A.13 COMPLIANCE WITH CLASS RULES

A.13.1 A boat ceases to comply with the class rules upon:
   (a) use of equipment that does not comply with limitations in the class rules,
   (b) use of equipment that does not comply, or that causes the boat not to comply, with limitations recorded on the certificate,
   (c) alteration or repair of equipment required by the measurement form(s) to be measured, except where permitted by the class rules,
   (d) a change of class rules that causes equipment in use to cease to be permitted, except where the equipment may comply with the class rules in force at the time of its initial certification control.

A.14 RE-CERTIFICATION

A.14.1 A hull may be issued with a new certificate, showing dates of initial and new certification control as applicable:
   (a) WHEN A CERTIFICATE BECOMES INVALID UPON CHANGE OF OWNERSHIP
       and the new owner applies to the certification authority in the country where the hull is to be registered. The application shall include the old certificate and re-certification fee if required. In the case of an imported hull the certification authority shall request the measurement form(s)
from the previous certification authority and a new hull registration number shall be issued,

(b) WHEN A CERTIFICATE HAS BEEN WITHDRAWN, OR WHEN THE CERTIFICATE AND MEASUREMENT FORM(S) CANNOT BE LOCATED

and certification control as required for initial certification has been undertaken.

A.14.2 A boat that has ceased to comply with the class rules may be brought into compliance:

(a) WHEN THE LIMITATIONS AFFECTING THE EQUIPMENT ARE IN THE CLASS RULES

by carrying out certification control of affected equipment,

(b) WHEN THE LIMITATIONS AFFECTING THE EQUIPMENT ARE ON THE CERTIFICATE

by carrying out certification control of affected equipment as required for initial certification.

Section B – Boat Eligibility

To be eligible to take part in racing, the rules in this section shall be complied with.

B.1 CERTIFICATE

B.1.1 The hull shall have a valid certificate.

B.1.2 A certificate issued prior to the effective date of these class rules remains valid until any of the criteria in A.12.1 is met.

B.2 CLASS ASSOCIATION STICKER

B.2.1 A valid class association sticker, if required by the NCA or the ICA, shall be affixed to the hull in a conspicuous position.
The \textbf{crew} and the \textbf{boat} shall comply with the rules in Part II when \textit{racing}. Measurement to check conformity with rules of Section \textit{C} is not part of \textit{certification control}.

The rules in Part II are \textbf{closed class rules}. Measurement shall be carried out in accordance with the ERS except where varied in this Part.

\section*{Section C – Conditions for Racing}

\subsection*{C.1 GENERAL}

\subsection*{C.1.1 RULES}

The following ERS rules shall not apply:

(a) B.7.1 Mainsail, Foresail and Mizzen Booms set on a Mast

(b) B.7.2 Headsail Booms.

\subsection*{C.2 CREW}

\subsection*{C.2.1 LIMITATIONS}

The \textbf{crew} shall consist of one person.

\subsection*{C.3 ADVERTISING}

\subsection*{C.3.1 LIMITATIONS}

The \textbf{boat} shall display only such advertising as permitted by the ISAF Advertising Code, Category \textit{C}.

\subsection*{C.4 BOAT}

\subsection*{C.4.1 DIMENSIONS}

With the \textbf{boat} floating in fresh water:

\begin{tabular}{l l}
  \textbf{Draught} & \textbf{minimum} & \textbf{maximum} \\
  & 370 mm & 420 mm \\
  \textbf{Hull length} & & 1000 mm \\
\end{tabular}

The depth of \textbf{hull} from waterline ................................................................. 60 mm

\subsection*{C.4.2 WEIGHT}

\begin{tabular}{l l}
  \textbf{minimum} & \textbf{maximum} \\
  The weight of \textbf{boat} in dry condition excluding wind indicator if used & 4000 g \\
\end{tabular}

\subsection*{C.4.3 CORRECTOR WEIGHT(S)}

\textbf{Corrector weight(s)} to achieve compliance with C.4.2, if used, shall be fixed
in/on the **hull** and not be altered or moved during an event.

**C.4.4 WATER**

Water shall not be used to trim the **boat** and it may be removed at any time.

**C.5 HULL**

**C.5.1 IDENTIFICATION**

The hull registration number shall be displayed on the external surface of the **hull** shell or deck clearly and legibly with a minimum height of 20 mm.

**C.5.2 MAINTENANCE**

Routine maintenance to the **hull** such as removing and adding fittings and remote control equipment, replacing **hull** patches, painting, polishing, smoothing etc., is permitted without re-measurement and re-certification provided the compliance with D.2 is not affected.

**C.5.3 REMOTE CONTROL EQUIPMENT**

**USE**

(a) The rudder control unit shall control the **rudder** only.

(b) The sheet control unit shall control the mainsail sheet and headsail sheet only.

(c) Except for control unit positioning and radio link information, no radio transmissions from the **boat** shall be made.

(d) During an event remote control and related equipment if temporarily removed and or replaced:

1. shall be refitted in the same position.
2. shall be replaced by equipment of similar weight.

**C.6 HULL APPENDAGES**

**C.6.1 MAINTENANCE**

The **hull appendages** may be altered after certification control, without undergoing new certification control, provided compliance with E.3 is not affected.

**C.6.2 LIMITATIONS**

Except when a **hull appendage** has been lost or damaged beyond repair, only one **keel** and one **rudder** shall be used during an event. Replacement may be made only with the approval of the race committee. Unless the **hull appendage** has been lost, the race committee shall remove or cancel any **Event Limitation Mark** attached to the **hull appendage** that has been replaced.

**C.6.3 USE**

(a) The **keel** shall not move or rotate relative to the **hull**, except by flexing.
(b) The **hull appendages** shall not project outboard of the **hull**.

(c) If removed:

   (1) The **keel** shall be refitted in the same attitude and position in the **hull**.

   (2) Parts of the **keel** shall be refitted in the same attitude and position relative to the **keel**.

   (3) The **rudder** shall be refitted in the same attitude and position relative to the **hull**.

---

**C.6.4 WEIGHTS**

<table>
<thead>
<tr>
<th></th>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Keel, excluding fasteners to <strong>hull</strong></td>
<td>2200 g</td>
<td>2500 g</td>
</tr>
<tr>
<td>Rudder, including stock</td>
<td>75 g</td>
<td>75 g</td>
</tr>
</tbody>
</table>

**C.7 RIG**

**C.7.1 LIMITATIONS**

Except when an item has been lost or damaged beyond repair, one **mast**, one mainsail **boom** and one headsail **boom**, for each of the three **rigs**, may be used during an event. Replacement may be made only with the approval of the race committee. Unless the **spar** is lost, the race committee shall remove or cancel any **Event Limitation Mark** attached to the **spar** that has been replaced.

**C.7.2 USE**

The **rig** shall not project beyond the fore and aft ends of the **hull**.

**C.7.3 ADDED WEIGHTS**

(a) Weights of any material may be positioned in and/or on a mast **spar** below the **lower point**. Weights of density greater than 8.000 kg/m$^3$ may be positioned in and/or on a mast **spar** above the **lower point**.

(b) Such weights may be removed or added at any time subject to C.4.1 and C.4.2.

**C.7.4 MAST**

(a) **DIMENSIONS**

<table>
<thead>
<tr>
<th></th>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Lower point to deck limit mark</strong></td>
<td>60 mm</td>
<td>100 mm</td>
</tr>
</tbody>
</table>

Within these limits, the variation in height of the **lower point** for each **rig** is unrestricted.

**Mast spar curvature** between **lower point** and **upper point** is unrestricted.

(b) **USE**

The **spar** stepping position and wind indicator position are optional.
C.7.5 BOOMS

DIMENSIONS

<table>
<thead>
<tr>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boom spar curvature</td>
<td>measured between points on the top of the spar 10 mm from each end</td>
</tr>
</tbody>
</table>

C.7.6 STANDING RIGGING

USE

The headsail boom swivel shall be attached to the hull approximately on the hull centreplane. The alignment of the swivel between the hull and the headsail boom shall be controlled only by the rigging tension.

C.7.7 RUNNING RIGGING

USE

(a) The mainsail sheet and the headsail sheet may be worked by a sheet control line attached to the sheet control unit.
(b) The upper end of any headsail boom topping lift shall be attached to the headsail halyard and/or stay, or their mast spar fitting(s).
(c) A headsail boom topping lift restraint line attached to, or passing around, the topping lift may be attached to and/or passed around any or all of the following: topping lift; headsail; headsail halyard; headsail stay; headsail boom.
(d) A mainsail tack control line may be passed around or through the mast spar, the mainsail boom spar and/or their fittings.

C.8 SAILS

C.8.1 MAINTENANCE

Routine maintenance such as replacement of battens and patching over damaged areas is permitted without re-measurement and re-certification.

C.8.2 LIMITATIONS

Except when a sail has been lost or damaged beyond repair, no more than one mainsail and one headsail, for each rig, shall be used during an event. Replacement may be made only with the approval of the race committee. Unless the sail is lost, the race committee shall remove or cancel any Event Limitation Mark attached to the sail that has been replaced.

C.8.3 IDENTIFICATION

Identification shall comply with the RRS. Sails certified before 1st January 2005 shall comply with the sail identification rules in force at that time or at the time of initial certification.

C.8.4 USE

(a) GENERAL

(1) A sail of one rig shall not be used with another rig.
(2) A sail may not be used alone, except where the other sail of that rig has been lost or damaged during the race.

(b) MAINSAIL

(1) The tack point shall not be set more than 25 mm forward of the forward end of the boom spar and the clew point shall not be set more than 25 mm aft of the aft end of the boom spar.

(2) Any luff bolt rope or luff slides shall be set in a mast spar track.

(3) Luff tabling may envelop a mast spar jackstay.

(c) HEADSAIL

(1) A line taken through the tack point and the head point shall cut the forward face of the mast spar lower than the lower edge of the headsail stay limit mark at the fore side of the spar when the boom spar is on the centreplane of the hull.

(2) The tack point shall not be set more than 25 mm forward of the forward end of the boom spar and the clew point shall not be set more than 25 mm aft of the aft end of the boom spar.

(3) Luff tabling may envelop the headsail stay.

(4) Any luff slides shall be set on the headsail stay.

Section D – Hull

D.1 GENERAL

D.1.1 RULES

The hull shall either comply with the class rules in force at the time of its initial certification control or comply with the current class rules.

D.1.2 CERTIFICATION

See rule A.11.

D.1.3 BUILDERS

(a) No building licence is required for hulls built in accordance with D.2.1.

(b) A building licence may be granted to commercial builders who wish to use mass production methods to lower the cost of hulls, but which do not comply with D.2.1. Such licence shall be based on a building specification approved by the ICA and the ISAF and a contract between the ISAF and the builder.

D.1.4 IDENTIFICATION

The hull registration number shall be marked in an easily visible location on a non-removable part of the hull excluding fittings and corrector weights by any of the following means: painting on, engraving in, bonding in, moulding in.

D.1.5 DECK LIMIT MARK

The deck limit mark shall be displayed on the centreplane of the hull near to
the mast position. It shall be a minimum of 5 mm in diameter.

**D.2 HULL**

**D.2.1 MATERIALS**

(a) Subject to (b) and (c), the hull, excluding fittings and remote control equipment but including any supports and containers for such items, shall be made of and joined using one or more of the following materials:

1. metal,
2. wood; wood based products containing only permitted materials,
3. glass fibre reinforced plastic,
4. adhesive,
5. varnish; paint,
6. film covering materials which may be fibre reinforced,
7. elastomeric material,
8. thermoplastic, which may be moulded, containing only permitted materials.

(b) In glass fibre reinforced plastic:

1. an external gel coat is optional and may be pigmented,
2. an external paint coating is optional,
3. the laminating resin shall be unpigmented,
4. the reinforcement shall be glass fibre in any of the following forms: roving, tape, chopped strand mat and woven cloth,
5. the interior shall be un-coated to permit non-destructive examination for verification of the material content.

(c) With the exception of elastomeric materials, materials shall not be: expanded, foamed, honeycombed.

(d) Unrestricted by (a) and (b):

1. a builder’s mark may be applied,
2. the hull registration number shall be applied.
3. A hull made with Texalium and with a date of initial fundamental measurement, prior to 1 September 2004 may be certified.

**D.2.2 CONSTRUCTION**

Construction is unrestricted subject to the following:

(a) The hull shall be a monohull.

(b) Except for trunking for the keel and rudder, the hull shall not have:

1. voids in the waterplane and/or the underwater profile,
2. hollows in the plan view and/or the underwater profile that exceed 3 mm,
3. transverse hollows in the undersurface of the hull that exceed 3 mm when tested parallel to the waterplane as in figure H.2.

(c) The forward 10 mm of the hull shall be of elastomeric material.

(d) The rudder shall be attached to the hull aft of where the keel is attached.
D.2.3 FITTINGS
Fittings are unrestricted except that:
(a) Fittings that can contribute to the stiffness and/or strength and/or watertight integrity of the hull shall be of materials permitted by D.2.1.
(b) Ball and/or roller bearings may be used for: sheet control line blocks, mainsail boom sheet blocks, headsail boom sheet blocks.
(c) Fittings shall not project outboard of the hull shell or deck.

D.2.4 REMOTE CONTROL EQUIPMENT
(a) The following is permitted:
   (1) One or more receivers.
   (2) One rudder control unit.
   (3) One sheet control unit.
   (4) Battery cells assembled in one or more packs.
   (5) Electric cables, connectors and switches.
   (6) One device to indicate the battery voltage. This device may also be included in any of the previous items (1) to (5).
(b) The rudder control unit and the sheet control unit may contain ball and/or roller bearings.
(c) Remote control equipment may be fastened using hook and loop fasteners and/or the materials listed in D.2.1(a).

Section E – Hull Appendages

E.1 PARTS

E.1.1 MANDATORY
   (a) Keel, which may comprise a fin and a bulb.
   (b) Rudder

E.2 GENERAL

E.2.1 RULES
   Hull appendages shall comply with the current class rules.

E.2.2 BUILDERS
   No licence is required.

E.3 KEEL AND RUDDER

E.3.1 MATERIALS
   Materials shall not be of density higher than lead (11.300 kg/m³).

E.3.2 CONSTRUCTION
   Construction is unrestricted subject to the following:
(a) The keel and rudder shall be removable from the hull.
(b) The keel and rudder shall not
   (1) be connected,
   (2) be articulated,
   (3) have openings through which water could flow when in use.

**E.4 KEEL**

**E.4.1 DIMENSIONS**

**Section F – Rig**

**F.1 PARTS**

**F.1.1 MANDATORY**

(a) Mast.
(b) Mainsail boom.
(c) Headsail boom.
(d) Standing rigging.
(e) Running rigging.
(f) Fittings.

**F.2 GENERAL**

**F.2.1 RULES**

Rigs shall comply with the current class rules.

**F.2.2 MANUFACTURERS**

No licence is required.

**F.2.3 LIMITATIONS**

The function of items shall be limited to what is normally provided by items of their type.

**F.2.4 CONSTRUCTION**

(a) Fittings and/or control lines may be combined provided their function is not extended beyond what is permitted.
(b) The position of parts, and the length and tension of rigging, may be adjustable unless otherwise restricted.
(c) Ball and/or roller bearings may be used for: kicking strap fitting; gooseneck; mainsail boom sheet blocks; headsail boom sheet blocks; headsail boom swivel.
F.3 MAST

F.3.1 MATERIALS
(a) The spar shall be aluminium alloy of 2024, 6005, 6061, 6063, 6082 or 7075 grade, or wood.
(b) Other permitted materials in the spar are: adhesive; paint; powder coat; varnish; wax. An aluminium alloy spar may be anodised.

F.3.2 CONSTRUCTION
(a) A mast stub arrangement is permitted and, if used, shall be taken to be part of the mast.
(b) Between the lower point and the upper point the spar section shall be:
(1) of circular outer shape,
(2) constant within the variations permitted by F.3.4 except for the following permitted items:
   - an internal sail track,
   - local cutaways for the insertion of a bolt rope or slides, openings for fittings and/or rigging, internal and/or external spar joiners.
(c) Limit marks may be applied by the following means:
   (1) paint,
   (2) self adhesive tape,
   (3) fittings.

F.3.3 FITTINGS
(a) MANDATORY
   (1) Mainsail halyard fitting or opening.
   (2) Shroud fitting(s) or opening(s).
   (3) Gooseneck.
   (4) Kicking strap fitting.
(b) OPTIONAL
   (1) Wind indicator and/or its fitting.
   (2) Backstay crane and its fitting.
   (3) Headsail stay fitting or opening.
   (4) Headsail halyard fitting or opening.
   (5) Pair of spreaders and their fittings(s) and/or opening(s).
   (6) Mast spar rings and/or loops to attach mainsail luff to the spar.
   (7) Mainsail jackstay fittings.
   (8) Mainsail tack fitting(s).
   (9) Mast strut and its fitting.
   (10) Checkstay fittings(s).
   (11) Deck fitting.
   (12) Heel fitting with or without mast jack.
(13) Added weights.

(c) CONSTRUCTION

(1) A mainsail halyard fitting may include one part that rotates with the sail about an axis located inside or outside the spar section.

(2) The mainsail boom spar and the kicking strap pivot points shall be aft of the mast spar in the regions adjacent to these points.

Total length of local cutaways between lower point and upper point ............................................. 100 mm

Limit mark width ......................................................................................................................... 3 mm ...... 10 mm

F.4 BOOMS

F.4.1 MATERIALS

(a) Spars shall be aluminium alloy of 2024, 6005, 6061, 6063, 6082, 7075, 7068 or 7178 grade, or wood.

(b) Other permitted materials in the spar are: adhesive, varnish, paint, wax, powder coat. An aluminium alloy spar may be anodised.

F.4.2 CONSTRUCTION

The spar section shall be constant within the variations permitted by F.4.5 except for

(a) the last 10 mm at each end,

(b) openings for fittings and rigging.
F.4.3 MAINSAIL BOOM FITTINGS

(a) MANDATORY
(1) Mainsail clew fitting(s).
(2) Mainsail boom sheet fitting(s).
(3) Kicking strap fitting.

(b) OPTIONAL
(1) Mainsail tack fitting(s).
(2) Gooseneck fitting.

F.4.4 HEADSAIL BOOM FITTINGS

(a) MANDATORY
(1) Headsail tack and clew fittings.
(2) Headsail boom sheet fitting(s).
(3) Swivel and/or its fitting(s).

(b) OPTIONAL
(1) Headsail stay fitting(s) or opening.
(2) Topping lift fitting(s) or opening.
(3) Counterweight and its attachment.

for an aluminium spar, the difference between the largest and smallest value along the spar of any wall thickness dimension

F.5 STANDING RIGGING

F.5.1 MATERIALS
Except for terminations and the headsail boom swivel, the standing rigging shall be of steel and/or polymer.

F.5.2 CONSTRUCTION

(a) MANDATORY
(1) Pair of shrouds.
(2) Backstay.
(3) Headsail boom swivel.

(b) OPTIONAL
(1) Pair of checkstays if a mast strut is not fitted.
(2) A headsail stay less than 1 mm in diameter.
(3) A mast spar jackstay less than 1 mm in diameter.

F.5.3 FITTINGS
OPTIONAL
(a) Terminations.
(b) Length and tension adjustments.

F.6 RUNNING RIGGING

F.6.1 MATERIALS
Materials of running rigging are unrestricted.

F.6.2 CONSTRUCTION
(a) MANDATORY
(1) Mainsail boom sheet.
(2) Mainsail boom kicking strap.
(3) Headsail halyard, if headsail stay is not fitted.
(4) Headsail boom sheet.

(b) OPTIONAL
(1) Mainsail halyard.
(2) Mainsail clew control line.
(3) Mainsail tack control line.
(4) Headsail halyard.
(5) Headsail clew control line.
(6) Headsail tack control line.
(7) Headsail boom topping lift.
(8) Headsail boom topping lift restraint line.

F.6.3 FITTINGS
OPTIONAL
(a) Terminations.
(b) Length and tension adjustments.
(c) Mainsail boom sheet blocks, headsail boom sheet blocks.

Section G – Sails

G.1 PARTS

G.1.1 MANDATORY
(a) Mainsail.
(b) Headsail.
G.2 GENERAL

G.2.1 RULES
Sails shall comply with the class rules in force at the time of their initial certification control.

G.2.2 CERTIFICATION
(a) The official measurer shall certify sails in the tack and shall date each with the date of certification control.
(b) An MNA may appoint one or more persons at a sailmaker to measure and certify sails produced by that manufacturer. A special licence shall be awarded for that purpose.

G.2.3 SAILMAKERS
No licence is required.

G.2.4 DEFINITIONS
Batten Pocket Point
The batten pocket point is defined as the intersection of the extended centreline of the batten pocket, or batten if there is no batten pocket, and the leech.

G.2.5 MEASUREMENT
(a) During measurement:
   (1) battens need not be removed,
   (2) mainsails with the luff not set in a mast spar track may be attached to spars,
   (3) a headsail stay and mainsail mast spar jackstay need not be removed.
(b) Where a mainsail has a luff bolt rope the luff shall be taken as the aft edge of the bolt rope.
(c) Luff slides shall be ignored when measuring sail dimensions provided that their total length, measured along the luff, does not exceed 10% of the luff length.

G.3 MAINSAIL

G.3.1 CONSTRUCTION
(a) MANDATORY
   (1) The construction shall be: soft sail, single ply sail.
   (2) The body of the sail shall consist of the same ply throughout and of not more than four parts joined by seams.
   (3) Seams shall not deviate more than 10 mm from a straight line between luff and leech.
   (4) The sail shall have three batten pockets, or battens if there are no batten pockets, at the leech.
   (5) The leech shall not extend aft of straight lines between:
(i) the **aft head point** and the nearest batten pocket point,
(ii) adjacent batten pocket points,
(iii) the **clew point** and the nearest batten pocket point.
where the batten pocket points are to be taken as defined in G.2.4.

(6) The **foot** shall not extend below a straight line between **tack point** and **clew point**.

(7) Class insignia.

(b) **OPTIONAL**

(1) **Tabling** at the **luff** may form a pocket for a mast **spar** jackstay.
(2) One or two cringles and/or openings at the **head**.
(3) One cringle and/or openings at each of the **clew** and **tack**.
(4) **Luff** openings for mast **spar** rings and/or loops for mast **spar** jackstay fittings.
(5) **Luff** bolt rope.
(6) **Luff** track slides.
(7) **Luff** fittings for mast **spar** rings and/or loops.
(8) **Luff** fittings for mast **spar** jackstay.
(9) **Primary reinforcement** specified at G.3.3.
(10) **Secondary reinforcement** specified at G.3.3.
(11) Tell tales.
(12) Not more than three sail shape indicator stripes, applied using paint or ink.
(13) Sailmaker labels.

**G.3.2 CONSTRUCTION TECHNIQUES**

(a) Only the following construction techniques shall be used where parts are joined or added as permitted in G.3.1 and G.3.3: welding; gluing; bonding with self adhesive tapes/materials; stitching.
(b) Except for stitching, the joining techniques used at **seams** shall not extend beyond the edges of the **seam**.

**G.3.3 DIMENSIONS**

---

**G.4 HEADSAIL**

**G.4.1 CONSTRUCTION**

(a) MANDATORY

(1) The construction shall be: soft sail, single ply sail.

(2) The body of the sail shall consist of the same ply throughout and of not more than three parts joined by seams.

(3) Seams shall not deviate more than 10 mm from a straight line between luff and leech.
(4) The leech shall not extend aft of a straight line between the aft head point and the clew point.

(5) The foot shall not extend below a straight line between tack point and clew point.

(b) OPTIONAL

(1) Tabling at the luff may form a pocket for a headsail stay
(2) One or two cringles and/or openings at the head.
(3) One cringle and/or openings at each of the clew and tack.
(4) Headsail stay slides and/or loops.
(5) Primary reinforcement specified at G.4.3.
(6) Secondary reinforcement specified at G.4.3.
(7) Not more than two batten pockets, or battens if there are no batten pockets, at the leech.
(8) Tell tales.
(9) Not more than two sail shape indicator stripes, applied using paint or ink.
(10) Sailmaker labels.

G.4.2 CONSTRUCTION TECHNIQUES

(a) Only the following construction techniques shall be used where parts are joined or added as permitted in G.4.1 and G.4.3: welding; gluing; bonding with self adhesive tapes/materials; stitching.

(b) Except for stitching, the joining techniques used at seams shall not extend beyond the edges of the seam.

Section H – Illustrations

H.1 CLASS INSIGNIA
H.2 TRANSVERSE HULL HOLLOWS

Rule D.2.2(b)(3)

The **hull** shall not have transverse hollows in the undersurface of the **hull** that exceed 3 mm when tested parallel to the waterplane.
Effective: 90 days after World Council adoption of the IOM CR changes
