## PART III – APPENDICES
INTRODUCTION

FORMULA 18 CLASS RULES GUIDING PRINCIPLES:

The box measurement rule allows manufacturers to develop catamarans that are competitively priced yet allowing freedom to builders to develop higher levels of performance. Being open to any manufacturer allows many builders and sail makers to compete and so keep costs to a minimum. The Class remains aware to keeping development under control, maintaining a good balance between cost and performance. Corrected crew weights allows fairer racing with more ladies involved as helms and crews.

IF18CA measures hulls, hull appendages, rigs and sails which are required to conform to IF18CA standards, such boat parts only being altered to stay in line with current IF18CA rules.
PART I – ADMINISTRATION

Section A – General

A.1 LANGUAGE
A.1.1 The official language of the IF18CA is English and in case of dispute over translation the English text shall prevail.
A.1.2 The word “shall” is mandatory and the word “may” is permissive.

A.2 ABBREVIATIONS
A.2.1 ISAF International Sailing Federation
MNA ISAF Member National Authority
IF18CA International Formula 18 Catamaran Association
NCA National Formula 18 Class Association
ERS Equipment Rules of Sailing
RRS Racing Rules of Sailing
IHC ISAF In-House Certification

A.3 AUTHORITIES
A.3.1 The International Authority of the IF18CA is the ISAF which shall co-operate with the IF18CA in all matters concerning these rules.
A.3.2 Notwithstanding anything contained herein, the IF18CA has the authority to withdraw a certificate and shall also do so on the request of the ISAF.
A.3.3 The IF18CA shall keep a record of the measurers recognized by a NCA, an MNA or ISAF.

A.4 ADMINISTRATION OF THE ASSOCIATION
A.4.1 The Class is administered by the IF18CA.
A.4.2 At National level, an NCA administers the Class, by IF18CA delegation. In countries where there is not an NCA, then IF18CA will cover such duties.

A.5 ISAF RULES
A.5.1 These rules shall be read in conjunction with the ERS.
A.5.2 Except where used in headings, when a term is printed in “bold” the definition in the ERS applies and when a term is printed in “italics” the definition in the RRS applies.

A.6 CLASS RULES VARIATIONS
A.6.1 At Class Events RRS 87 and ISAF Regulation 26.5(f) apply.

A.7 CLASS RULES AMENDMENTS
A.7.1 Amendments to these rules are subject to the approval of the ISAF in accordance with the ISAF Regulations, and then ratified by the World Council of the IF18CA before implementation.
A.7.2 Amendments shall be placed on one year's notice unless it is considered essential to act immediately to prohibit or penalize an undesirable feature.

A.8 CLASS RULES INTERPRETATION
A.8.1 Interpretation of these rules shall be made in accordance with the ISAF Regulations.
A.8.2 These rules shall take precedence over the Measurement Form.
A.8.3 Any interpretation of these rules required at an event may be made by the International Jury constituted in accordance with RRS (Appendix N). Such interpretation shall only be valid during the event and the Organising Authority shall, as soon as practical after the event inform ISAF, the MNA and the IF18CA.

A.9 INTERNATIONAL CLASS FEE AND ISAF BUILDING PLAQUE
A.9.1 International Class fee shall be paid every year to ISAF.
A.9.2 From 1 November 2009 all new boats shall have ISAF plaques affixed to the boats.

A.10 RECORD OF MEASUREMENT CERTIFICATES
A.10.1 Each NCA shall keep a complete record of all F18 catamarans and sails that have been certified within that country.

A.11 BOAT CERTIFICATION
A.11.1 A certificate shall record the following information:
   (a) Class
   (b) Certification authority
   (c) Measurement Certificate number issued by the certification authority
   (d) Owner
   (e) Hull identification
   (f) Builder/Manufacturers details and agreement that boat and sails are made in line with IF18CA rules. Builder/sailmaker declaration.
   (g) Date of issue of initial certificate
   (h) Date of issue of certificate.

A.12 INITIAL BOAT CERTIFICATION
A.12.1 For a certificate to be issued to boat not previously certified:
   (a) Certification control shall be carried out by the official measurer who shall complete the appropriate documentation.
   (b) The documentation and certification fee, if required, shall be sent to the certification authority.
   (c) Upon receipt of a satisfactorily completed documentation and certification fee, if required, the certification authority may issue a certificate.

A.13 VALIDITY OF CERTIFICATE
A.13.1 A certificate becomes invalid upon:
(a) the change to any items recorded on the hull certificate as required under A.11.1
(b) any alteration to corrector weights
(c) withdrawal by certification authorities
(d) the issue of a new certificate

A.14 BOAT RE-CERTIFICATION
A.14.1 The certification authority may issue a certificate to a previously certified boat:
(a) when it is invalidated under A.13.1(a) or (b), after receipt of the old certificate, and certification fee if required.
(b) when it is invalidated under A.13.1 (c), at its discretion.
(c) in other cases, by application of the procedure in A.12.

A.15 RETENTION OF CERTIFICATION DOCUMENTATION
A.15.1 The certification authority shall:
(a) retain the original documentation upon which the current certificate is based.
(b) upon request, transfer this documentation to the new certification authority if the hull is exported.
Section B – Boat Eligibility

For a boat to be eligible for racing, it shall comply with the rules in this section

B.1 CLASS RULES AND CERTIFICATION

B.1.1 The boat shall:
(a) be in compliance with these class rules
(b) have a valid certificate for platform, mast, sails, appendages
(c) have valid certification marks as required
(d) have a completed, signed and dated Measurement Form.

B.1.2 A certificate may be refused if there is any doubt over compliance with these class rules. An Official Measurer shall report on the Measurement Form anything which he considers in breach of these class rules, and shall not sign the Form. A copy of the incomplete Form, together with an explanation of the points in question shall immediately be sent to the IF18CA Secretariat and the ISAF for a ruling in writing.

B.1.3 All certified boats may be liable to re-measurement at the discretion of the certification authority or by an International Jury constituted in accordance with the RRS (Appendix N.) at an event, but only by an Official Measurer.

B.2 CERTIFICATION MARKS

B.2.1 A valid Association sticker as required by the IF18CA shall be affixed to each measured item in the required position (see diagram in Appendix B), as a part of certification marks.
PART II – REQUIREMENTS AND LIMITATIONS

The intention of these Class rules is to ensure that the boats are as alike as possible in all aspects affecting performance as F18 is a Measurement Controlled Class. The crew and the boat shall comply with the rules in Part II when racing. In case of conflict Section C shall prevail.

The rules in Part II are closed class rules where anything not specifically permitted by the Class rules is prohibited. Certification control and equipment inspection shall be carried out in accordance with the ERS except where varied in this Part.

Section C – Conditions for Racing

C.1 GENERAL

C.1.1 RULES
(a) The ERS shall apply.
(b) RRS 49.1 shall not apply.
(c) RRS 50.4 shall not apply.
(d) RRS Appendix G.1.3 (d) shall not apply.

C.2 ADVERTISING

C.2.1 LIMITATIONS
Advertising shall only be displayed in accordance with the ISAF Advertising Code.

C.3 CREW

C.3.1 MEMBERSHIP
a) Crews are not permitted to enter a Formula 18 event unless they are current members of their NCA.
b) In countries where there is no NCA, the crew shall be member of the IF18CA.

C.3.2 LIMITATIONS
(a) The crew shall consist of 2 persons.
(b) The crew shall be dressed in underwear or swimming costume when weighed.
(c) The crew shall use the sails (as defined in G.2.3) in accordance with the following weight categories:
(1) Crew from 115 kg to less than 130 kg shall sail with the small jib and small spinnaker and then shall carry extra weight equal to half the difference between their actual weight and 130 kg.
(2) Crew weighing 130 kg and over may sail with the small jib and the small spinnaker and shall not carry extra weight,
(3) **Crew** between 130 kg and 135 kg may use the large jib and large spinnaker and then shall carry extra weight equal to the difference between their actual weight and 135 kg plus 7.5 kg.

(4) **Crew** between 135 kg and 150 kg may use the large jib and large spinnaker and shall carry extra weight equal to half the difference between their actual weight and 150 kg.

(5) **Crew** weighing 150 kg and over may use the large jib and the large spinnaker without carrying any extra weight.

C.3.3 **WEIGHTS**

(a) The minimum combined **crew** weight is 115 kg

(b) They are FIVE categories of **crew** weight:

(1) from 115 kg to less than 130 kg

(2) from 130 kg to 135 kg

(4) from 135 kg to 150 kg

(5) above 150 kg

(c) **Crew** corrector weights shall be of metal and securely fastened on the port side, either to the outside of the front crossbeam or to the strut, and shall be removable for checking.

(d) **Crews** may be weighed at Registration for a regatta if stated in NoR and again at any time by the Race Committee.

C.3.4 **LONG DISTANCE RACING**

(a) The crew shall be able to re-right the boat after a capsize. They may be asked to demonstrate their ability to do so.

C.4 **PERSONAL EQUIPMENT**

C.4.1 **MANDATORY**

The **crew** shall wear a **personal floatation device** to the minimum standard EN393, ISO 12402-5 (CE 50 Newtons), USCG Type III, or AUS PFD 2.

C.4.2 **OPTIONAL**

(a) Trapeze harness for each member of **crew**

(b) All other **personal equipment**

C.5 **PORTABLE EQUIPMENT**

C.5.1 **FOR USE**

(a) **MANDATORY**

(1) One righting line, minimum 4 metres long and 10 mm minimum diameter.

(2) One steering compass.

(b) **OPTIONAL**

(1) Steering compasses.

(2) Mechanical timing devices. Mechanical wind indicators.
(3) Electronic devices that provide timing, heading, and heading memory but which do not transmit or receive data.

(4) When required by the Notice of Race for long distance courses, organisers may require further equipment, such as VHF, mobile phone, GPS or tracking devices, Emergency Positioning Indicating radio beacons (EPIRB) devices, knife, mirror, whistle, flares, flashlights, first aid set.

C.5.2 FOR USE

(a) MANDATORY

(1) Towing line of 15 metres long and 6 mm minimum diameter.

(b) OPTIONAL

(1) When required in the Notice of Race, one paddle with minimum total length of 1000 mm. The paddle blade shall be minimum 140 mm wide and minimum 250 mm long.

C.6 BOAT

C.6.1 WEIGHT

(a) PLATFORM

(1) The minimum weight of the platform shall be 130 kg.

(2) The platform shall be weighed assembled.

   It comprises: the assembled hulls, the hull appendages, the trampoline, tiller, tiller extension, mainsheet and jib sheet systems, compass(es), corrector weights and the righting line and all equipment and control lines normally bolted, screwed or fixed in a permanent manner on the boat, not to include the towing line.

(b) BOAT READY TO SAIL

(1) The total weight of the boat, ready to sail, shall not be less than 180 kg.

(2) The weight of the boat ready to sail shall be the platform as in C.6.1(a) carrying the equipment normally used for navigation with the standing and running rigging as in C.9 and a set of sails with battens as in C.10.

(3) The weights of the platform (C.6.1(a)) and of the boat ready to sail (C.6.1(b)), each excluding corrector weights, and the certificate number shall be indelibly written by the measurer in line with Appendix B, Diagrams.

C.6.2 CORRECTOR WEIGHTS

(a) A maximum of 7 kg of corrector weight is allowed to comply with both platform and ready to sail minimum weights.

(b) Corrector weight shall be securely fastened to the outside on the starboard side of the forward beam or to the strut and shall be removable for checking.

(c) Corrector weight shall be of metal.
C.6.3 FLOATATION
(a) It is the responsibility of the skipper to ensure at all times the watertightness of the boat.
(b) If there is any doubt regarding compliance with C.6.3 (a), an official measurer, race committee or jury may order a buoyancy test. If the buoyancy is deemed unsatisfactory, the matter shall be referred to the certification authority and the certificate may be withdrawn until satisfactory remedial measures have been taken.

C.7 HULLS
C.7.1 FITTINGS
(a) Hatch covers, and drain bungs if fitted, shall be kept in place when sailing.
(b) Each hull shall have at least one inspection hatch. All other fittings are optional

C.7.2 MODIFICATIONS, MAINTENANCE AND REPAIR.
(a) Holes not bigger than necessary for the installation fittings and passage of lines may be made in the hull.
(b) Sealing strips of any suitable material for centreboard/daggerboard slots are permitted.
(c) Routine maintenance such as painting and polishing is permitted without re-measurement and re-certification, providing that the intention and the effect is to polish the hulls only.
(d) The application of vinyl or other film over the hull surface is allowed only for the purpose of displaying advertising and graphics. Performance enhancing film, or those with textured or modified surface which would alter or improve the flow around the hull are not allowed.

C.8 HULL APPENDAGES
C.8.1 FITTINGS
(a) Rudder retention devices capable of retaining rudder in event of capsize.

C.8.2 LIMITATIONS
(a) Only two daggerboards or centreboards and two rudders may be used during an event, except when a hull appendage has been lost or damaged beyond repair. Such replacement may only be made with the approval of the Race Committee.
(1) The board cases, the daggerboards and the rudders shall be positioned in the centre plane of the hulls, and the underwater parts of the boards and of the rudders shall be symmetrical.
(2) The two rudders shall be hung on the transoms, one on each transom.

C.9 RIG
C.9.1 FITTINGS
(a) Sail and mast adjustment fittings may be fitted.
C.9.2 USE
   (a) When stepped the **mast datum point** shall not be more than 120 mm above the top of the front beam.

C.9.3 LIMITATIONS
   (a) Only one set of spars shall be used during an event, except when lost or damaged beyond repair.
   (b) Replacement of damaged spars may only be made with the approval of the Race Committee.

C.9.4 BOOM
   (a) The **boom**, if fitted, may have fittings attached.

C.9.5 BOWSPRIT
   (a) The **bowsprit** shall be fixed in a fore and aft position and shall not be adjustable while sailing.
   (b) The **bowsprit** may have fittings attached.

C.9.6 STANDING RIGGING
   (a) It is NOT permitted to adjust: mast rake, tension of standing rigging, angle or length of spreaders or diamond wire tension.
   (b) The **forestay** shall be attached on the centreline of the **boat**.
   (c) Trapeze wires may have adjustable height.

C.9.7 RUNNING RIGGING
   (a) **Running rigging** shall be led outside the **mast spar**.
   (b) With the exception of C.9.7 (a), the way of leading **running rigging** is optional.

C.10 SAILS
C.10.1 LIMITATIONS
   (a) The **sail** plan shall consist of 1 **mainsail**, 1 jib, 1 spinnaker which shall be carried aboard. No sail shall be replaced during a regatta, except when a sail has been lost or damaged beyond repair, then only with permission of the Race Committee. The Race Committee shall then remove or cross out any event limitation mark attached to the replaced **sail**.
   (b) **Sails** shall not be altered in any way except as permitted by these **rules**.
   (c) Routine maintenance is permitted without re-measurement and re-certification.
   (d) Sails shall be allocated to crews with different weight categories according to C.3.3

C.10.2 MAINSAIL
   (a) IDENTIFICATION
      The national letters and sail numbers shall comply with the **RRS Appendix G**.
   (b) USE
      (1) The **sail** shall be hoisted on a **halyard**. The arrangement shall permit hoisting and lowering of the **sail** whilst afloat.
(2) The **luff** bolt rope shall be in the **spar** groove.
(3) The **mainsail** may be loose footed.

C.10.3 JIB
(a) **USE**
(1) The **sail** shall be set on the **forestay**.
(2) The **tack point** shall not be fixed below the apex of the bridle wire.

C.10.4 SPINNAKER
(a) **USE**
(1) The **sail** shall be set between the **mast** and the **bowsprit**.

**Section D - Hulls**

**D.1 PARTS**

**D.1.1 MANDATORY**
(a) Hull shells
(b) Front beam
(c) Rear beam
(d) Trampoline

**D.1.2 OPTIONAL**
(a) Bulkheads
(b) Sub-decks
(c) Fittings

**D.2 GENERAL**

**D.2.1 RULES**
The **hull** shall comply with the **rules** in force at the time of initial **certification**.

**D.2.2 CERTIFICATION**
Only the controls, measurements and calculations made by a measurer recognized by the IF18CA, a MNA or ISAF are considered valid.

**D.2.3 IDENTIFICATION**
(a) Hulls shall have a serial number.
(b) From 1st November 2009, all new **hulls** shall carry the ISAF Plaques permanently placed on the transoms or on the inside of the hulls just below the rear beam.

**D.2.4 BUILDERS**
(a) A licence is not required.
(b) Builders shall supply a Builders Declaration, confirming that the boat was built to rules in force at the time of manufacture:
D.3  **HULL SHELLS**

D.3.1  **MATERIALS**

(a) The hull shells shall be built from polyester or vinylester resin, glass fibres, polyester gel coat, the combination of wood-epoxy or injected plastic with a core of PVC or balsa or felt. The hull shells shall not be altered, other than locally for fittings and passage of equipment and normal reinforcement. Epoxy glue is permitted for joining components. Every material that is not expressly permitted is prohibited.

(b). Vinyl or similar adhesive film may be added as limited by C.7.2.(f).

D.3.2  Construction

(a) Hulls are not required to be symmetrical

D.4  **BEAMS**

D.4.1  **MANDATORY**

(a) Front Beam

(b) Rear beam

D.4.2  **CONSTRUCTION**

(a) The beams shall be made of extruded aluminium profiles of constant section.

(b) The curvature of the beams shall be limited to a maximum of 15 mm.

(c) The **mast** pivot on the front beam shall be fixed on the centreline of the boat.

(d) The front beam may have a strut and tie of optional material, excluding carbon.

(e) The rear beam may incorporate a mainsail traveller track.

(f) The front beam may incorporate a jib traveller track and/or a self tacking system, and sail adjustment fittings.

(g) A local reinforcement is permitted inside the front beam for the mast step.

(h) Local reinforcements are permitted inside the front beam and the rear beam for supporting fixing bolts.

(i) The **mast** step shall be in a fixed position

(j) The beams may accommodate adjustment fittings

(k) Any holes for fittings may only be as large as necessary to house the fittings.

D.5  **TRAMPOLINE**

D.5.1  **MATERIALS**

(a) The type of material used is optional; however netting is not permitted.

(b) The material shall not have holes any larger than 5mm, when fitted in sailing position, with the exception of holes for sails/sailing adjustments and trampoline tensioning.
(c) Temporary damage to trampoline is not classed as holes.

D.5.2 CONSTRUCTION
(a) A single trampoline, which may be in separate sections, shall cover the area between the front beam and the rear beam.
(b) Fittings for the attachment of the trampoline are optional.
(c) A spinnaker bag is permitted.
(d) Storage bags and pouches are permitted.

D.6 ASSEMBLED HULLS

D.6.1 CONSTRUCTION
(a) The **hulls** shall be joined rigidly by a front beam and a rear beam.
(b) Non slip surfaces, built in or applied to the **hulls**, are allowed.

D.6.2 DIMENSIONS
(a) The maximum **hull length** shall be 5.52 m.
(b) The maximum **boat beam** shall be 2.60 m.
(c) The **boat** centre plane is the vertical longitudinal plane of the **boat** that passes through the centre point of the front and rear beams.

D.6.3 FITTINGS
(a) MANDATORY
   (1) Shroud fittings attachments.
   (2) Forestay bridle fittings attachments.
   (3) Bowsprit fittings attachments.
(b) OPTIONAL
   (1) Fittings for the attachment of the trampoline.
   (2) Fittings for adjustment of sails and rig.
   (3) Foot loops, toe straps, trapeze gear, crew restraining line.
   (4) Fittings for rudders.
   (5) Centreboard/daggerboard retention/placement fittings.
   (6) Inspection hatches.

Section E – Hull Appendages

E.1 PARTS
E.1.1 MANDATORY
(a) **Rudders**
(b) **Tillers**
(c) **Tiller** connecting bar
(d) **Rudder** pins or pintles
(e) **Rudder** gudgeons.
E.1.2 OPTIONAL
(a) Centreboard
(b) Daggerboard
(c) Tiller extension.

E.2 GENERAL
E.2.1 RULES
(a) Hull appendages shall comply with the Class rules in force at the time of certification.

E.2.2 MODIFICATIONS, MAINTENANCE AND REPAIR
(a) Hull appendages shall not be altered in any way except as permitted by these class rules.
(b) Routine maintenance such as cleaning and sanding is permitted without re-measurement and re-certification.

E.2.3 CERTIFICATION
(a) A measurer recognized by the IF18CA, a MNA or ISAF shall certify hull appendages and shall number the certification mark.

E.2.4 MANUFACTURERS
(a) Licence is not required to manufacture hull appendages (See D.2.4 a)

E.3 CENTREBOARD/DAGGERBOARD
E.3.1 RULES
(a) There shall be a maximum of one centreboard/daggerboard per hull.
(b) The centreboard/daggerboard shall comply with the class rules in force at the time of the certification.
(c) A measurer recognized by the IF18CA, a MNA or ISAF shall certify centreboards/daggerboards and shall write the certificate number on the certification mark.

E.3.2 MATERIALS
(a) The centreboards/daggerboards may be made using epoxy resin, carbon, wood, glass fibre, foam plastics, resins, paints, glues and metal fastenings.

E.3.3 CONSTRUCTION
(a) The daggerboards/centreboards shall have no moving parts.
(b) The cross section of each centreboard/daggerboard shall be symmetrical about the hull centreplane.
(c) The centreboard/daggerboards shall not protrude more than 1400mm from the bottom of the hull and shall be fitted so that they cannot protrude below this level.
(d) Curved dagger boards are not allowed. The manufacturing tolerance is 10mm of curvature over the total length of the board.
(e) The centre of mass of the daggerboards shall be above 50% of the length of the board measured from the top of the daggerboard. Ballast or mass of whatever nature is not permitted.
(f) Hull appendages may be angled outwards at the keel from the boat centreplane. Hull appendages shall not be angled inwards at the keel from the boat centreplane, except where this is caused by the curvature of the front beam, as per Rule D.4.2 (b)

E.3.4 WEIGHTS
(a) The maximum weight of each centreboard/daggerboard is 5.5 kg. The weight of each centreboard/daggerboard shall be noted on the measurement form.

E.3.5 FITTINGS
(a) Pivot bushings, height restraining or adjusting systems may be fitted.

E.4 RUDDER BLADE, RUDDER STOCK AND TILLER
E.4.1 RULES
(a) The rudder blade shall comply with the rules in force at the time of certification.

E.4.2 CERTIFICATION
(a) A measurer recognized by the IF18CA, a MNA or ISAF shall certify rudder blades and shall write the certificate number on the certification mark.

E.4.3 MATERIALS
(a) Rudder blade may be made using epoxy resin, carbon, wood, glass fibre, foam plastics, resins, paints, glues and metal fastenings.
(b) Materials for the rudder stock are optional, except carbon.
(c) Materials for the tiller extension are optional.
(d) The tiller cross bar shall be made of aluminium profile of constant section.
(e) The tiller cross bar may have reinforcement in the central fittings.
(f) The tiller cross bar may have reinforcement to support connection to tiller arms.

E.4.4 CONSTRUCTION
(a) The centre of mass of the rudders shall be above 50% of the length of the board measured from the top of the board. Ballast or mass use of whatever nature in not permitted.
(b) The cross section of each rudder shall be symmetrical about the hull centreplane.

E.4.5 FITTINGS
(a) MANDATORY
   (1) 2 rudder fittings
(b) OPTIONAL
   (1) 2 gudgeons.
   (2) 2 pins or pintles.
   (3) Pivoting and/or lowering systems.
E.4.6 WEIGHTS
(a) The minimum weight of each rudder assembly comprising blade, stock with fittings and tiller is 3 kg. For rudders built before 1st January 1996 corrector weights may be added to achieve the minimum weight. The controlled weight shall be noted on the measurement form.

Section F - Rig

F.1 PARTS
F.1.1 MANDATORY
(a) Mast
(b) Standing rigging
(c) Running rigging
(d) Bowsprit

F.1.2 OPTIONAL
(a) Boom

F.2 GENERAL
F.2.1 RULES
(a) The spars and their fittings shall comply with the rules in force at the time of certification of the spar.
(b) The standing and running rigging shall comply with the Class Rules.
(c) The boom (if fitted), bowsprit, standing and all running rigging shall comply with the Class rules.

F.2.2 MODIFICATIONS, MAINTENANCE AND REPAIR
(a) Spars shall not be altered in any way except as permitted by these Class Rules.
(b) Routine maintenance such as cleaning and minor repairs is permitted without re-measurement and re-certification.

F.2.3 CERTIFICATION
(a) A measurer recognized by the IF18CA, a MNA or ISAF shall certify spars and shall write the certificate number on the certification mark.
(b) Certification of standing and running rigging, bowsprit and boom is not required.
(c) Each mast shall have a certification mark on the starboard side.

F.2.4 MANUFACTURER
(a) Licence is not required to manufacture spars.
F.2.5 DEFINITIONS
(a) MAST DATUM POINT

The mast datum point is located at the front edge of the mast spar, on the longitudinal axis, on the lower end of the profile. See Appendix B.

F.2.5 DIMENSIONS
(a) The distance between the top of the front beam and the mast datum point shall not exceed 120mm.

F.3 MAST
F.3.1 CONSTRUCTION
(a) The mast extrusion shall be made of aluminium and shall be of constant section throughout its length.
(b) The mast shall have one fixed sail groove, which shall be integral with the mast spar and shall be of the same material.
(c) The mast shall have masthead fittings, which shall include the mainsail sheave and locking device.
(d) The mast shall have a heel fitting attached.
(e) The mast pivot shall be fixed on the centreline of the front beam.
(f) Forestay, diamond wires and shroud tension/rake adjustment devices or fittings are permitted

F.3.2 DIMENSIONS
(a) The mast shall be watertight from 450 mm above the mast datum point upwards.

</tr>
</tbody>
</table>

F.3.3 FITTINGS
(a) MATERIALS
(1) Carbon fibre is only allowed in cleats, turning blocks and spreader bar construction

(b) MANDATORY
(1) Masthead fittings which shall include mainsail halyard sheave and locking device.
(2) Heel fitting.
(3) Hounds fittings.

(c) OPTIONAL
(1) Pair of spreader bars and fittings.
(2) Diamond stay attachment and adjustment fittings
(3) Spinnaker halyard guide
(4) Spinnaker halyard block and attachments
(5) Gooseneck fittings
(6) Mast rotation control fittings
(7) Mast may have reinforcement at fittings points
(8) Cunningham downhaul fittings

F.4 BOOM
F.4.1 MATERIALS
(a) The boom, if fitted, shall be made of extruded aluminium of constant section.

F.4.2 CONSTRUCTION
(a) The boom shall not be measured as part of the mainsail in the measurement process.

F.4.3 FITTINGS
(a) Fittings are optional.

F.5 BOWSPRIT
F.5.1 RULES
(a) The bowsprit shall be on the longitudinal centreline of the boat.
(b) The bowsprit shall be attached to the front beam.

F.5.2 MATERIALS
(a) The bowsprit shall be made of aluminium of constant section.

F.5.3 CONSTRUCTION
(a) The bowsprit shall have an end cap that is smooth, rounded and blunt.
(b) The bowsprit may be fitted with a spinnaker retrieval system. This system shall not be of carbon fibre on boats certified after 1 January 2007.

F.5.4 FITTINGS
(a) MANDATORY
   (1) Attachment points to hulls.
(b) OPTIONAL
   (1) Adjustment fittings.
   (2) Wind indicator(s).

F.5.5 DIMENSIONS
(a) The length of the bowsprit shall not exceed the distance from the centre of the front beam to a vertical line touching the most forward part of the hull plus 800 mm, with the bowsprit measured when horizontal.

F.6 STANDING RIGGING
F.6.1 MATERIALS
(a) The standing rigging shall be of stranded stainless steel with the exception of bowsprit bridles and trapeze which may be of rope.
(b) Fittings, such as cleats, blocks may be made from/or include carbon fibre in their construction.

F.6.2 CONSTRUCTION

(a) MANDATORY

(1) A forestay and forestay bridles of 1 x 19 or 1 x 7 stranded stainless steel wire of minimum diameter of 4 mm.

(2) Shrouds of 1 x 19 or 1 x 7 stranded stainless steel wire of minimum diameter of 4 mm.

(3) Trapeze wires of stranded stainless steel wire or rope of minimum diameter of 2.5 mm.

(b) OPTIONAL

(1) A pair of diamond wires of 1 x 19 or 1 x 7 stranded stainless steel wire of minimum diameter of 4 mm.

(2) The bowsprit bridles may be of rope of minimum diameter of 2.5 mm.

F.7 RUNNING RIGGING

F.7.1 MATERIALS

(a) Materials are optional.

F.7.2 CONSTRUCTION

(a) MANDATORY

(1) Mainsail halyard.

(2) Mainsail sheet.

(3) Jib halyard.

(4) Jib sheet.

(5) Spinnaker halyard.

(6) Spinnaker sheets.

(7) Bowsprit setting and retraction lines.

(b) OPTIONAL

(1) Rig adjustments

(2) Sail adjustments

Section G – Sails

G.1 PARTS

G.1.1 MANDATORY

(a) Mainsail

(b) Jib

(c) Spinnaker
G.2 GENERAL

G.2.1 RULES
(a) **Sails** shall comply with the rules in force at the time of certification.

G.2.2 CERTIFICATION
(a) A measurer recognized by the IF18CA, a MNA or ISAF shall certify all sails.
(b) A Sailmakers Declaration is required with each sail.
(c) **Main**, **jib** and **spinnaker** shall have labels that shall be completed by the sail maker before measurement, indelibly marked, plaque or label, near the **tack point** with name of manufacturer, materials used, date of manufacture and serial number.

G.2.3 DEFINITIONS
The sails corresponding to the different weight categories of crew (C.3.3) shall be identified as follows:

1. Large Jib with a maximum area of 4.15 m²
2. Small Jib with a maximum area of 3.45 m²
3. Large Spinnaker with a maximum area of 21 m²
4. Small Spinnaker with a maximum area of 19 m²

G.2.4 SAILMAKER
(a) Licence is not required to manufacture sails.

G.3 MAINSAIL

G.3.1 IDENTIFICATION
(a) The Class insignia shall conform with the dimensions and requirements as detailed and be placed in accordance with the diagram contained in Appendix B.

G.3.2 MATERIALS
(a) The **ply** fibres shall consist only of polyester materials as detailed in the Mainsail Sailcloth Appendix.
(b) **Stiffening** shall not incorporate carbon fibre and may consist of:
   1. Corner boards
   2. Battens
(c) **Sail reinforcement**
   1. **Primary reinforcement** shall be any woven polyester, or any cloth on the Mainsail Cloth List
   2. **Secondary reinforcement** shall be any cloth on the Mainsail Cloth List

G.3.4 CONSTRUCTION
(a) The construction shall be **soft sail, single-ply sail**.
(b) The **body of the sail** shall consist of the same woven ply or laminated ply throughout with the exception of the **window** which may be different.
(c) The number of **batten pockets** is optional.
(d) The following are permitted: stitching, glues, tapes, bolt ropes, corner eyes, headboard with fixings, Cunningham eye or pulley, reefing points, battens, **batten pocket patches**, batten pocket elastic, batten pocket end caps, mast and boom slides, leech line with cleat, one window, tell tales, sail shape indicator stripes and items as permitted or prescribed by other applicable rules.

(e) A **window** of a minimum of 0.8 sqm shall be placed in the lower third of the sail. This window shall comply with the Sailcloth Appendix.

(f) The **sail** shall be loose footed.

### G.4 JIB

#### G.4.1 MATERIALS

(a) The **ply** fibres shall consist only of polyester materials as detailed in Jib Sailcloth Appendix.

(b) **Stiffening** shall not incorporate carbon and may consist of:

1. Corner boards
2. Battens

(c) **Sail reinforcement**

1. **Primary reinforcement** shall be any woven polyester, or any cloth on the Jib Cloth List
2. **Secondary reinforcement** shall be any cloth on the Jib Cloth List

#### G.4.2 Construction

(a) The construction shall be: **soft sail, single-ply sail**.

(b) The body of the sail shall consist of the same woven ply or laminated ply throughout with the exception of the window which may be different.

(c) The **body of the sail** shall comply with Sailcloth Jib Appendix.

(d) The jib may have either:
(1) A maximum of four battens, no external part of which exceeding 250mm from the leech.

OR:

(2) From 1st March 2007, a maximum of three full length battens, which shall have no moving parts and be made of glass fibre.

(e) The leech shall not be convex.

(f) The following are permitted: stitching, glues, tapes, corner eyes, headboard with fixings, Cunningham eye or pulley, zips, Velcro and sleeve luffs, battens, batten pocket patches, batten pocket elastic, batten pocket end caps, leech line with cleat, tell tales, one window and items as permitted or prescribed by other applicable rules.

(g) From 4 March 2008, a window of a minimum of 0.3 m² shall be placed in the lower third of the sail. This window shall comply with the Sailcloth Appendix.

<td>0.3 m²</td>
<td>-</td>
</tr>
</tbody>
</table>

G.5 SPINNAKER

G.5.1 MATERIALS

(a) The ply fibres shall consist only of nylon or polyester materials as detailed in Spinnaker Sailcloth Appendix.

(b) Sail reinforcement

Primary and secondary reinforcement is permitted at the sail corners and the recovery points.

(1) Primary reinforcement shall be any woven polyester, or any cloth on the Spinnaker Cloth Appendix.

(2) Secondary reinforcement shall be any cloth on the Spinnaker Cloth Appendix.

G.5.2 CONSTRUCTION

(a) The construction shall be: soft sail, single ply sail.

(b) The body of the sail shall consist of the same woven ply throughout.

(c) The body of the sail shall comply with the Sailcloth Spinnaker Appendix.

(d) Laminated ply of any sort are not allowed anywhere in the spinnaker. This includes leech, luff and foot tapes, corner patches and retrieval points.
Reinforcing tapes to secure eyelets or rings are allowed at spinnaker corners and retrieval points. Tapes may be polyester or spectra.

(e) The following are permitted: stitching, glues, tapes, corner eyes, recovery line eyes, tell tales, leech and luff lines and items as permitted or prescribed by other applicable rules.

(f) The area and the dimensions of the spinnaker (SL1, SL2, SMG, SF) shall be written in an indelible manner near the starboard tack.

International Formula 18 Catamaran Association

Builder’s declaration of rule compliance
In accordance with the International Formula 18 Catamaran Association (I18CA) Class Rules, I declare that the platform which has been issued the serial number ………………………………… has been constructed in full compliance with the IF18CA Class Rules on the date of …………………….

I confirm that compliance with the rules has been established, and technical data sheets on materials shall be made available to IF18CA Chief Measurer at their request.
