How to find & break the chains of transmission

IDENTIFY

people with COVID-19 infection through symptoms (cough, fever, shortness of breath) and/or testing

ISOLATE & TREAT PATIENTS

in dedicated health facilities/wards, temporary isolation facilities (mild cases) or at home (when there is no other option)

MAKE A LIST

of people who have been in contact with those infected (from two days before symptom onset)

QUARANTINE CONTACTS FOR 14 DAYS

in a special facility or at home and test them if they develop symptoms

MONITOR CONTACTS DAILY

for onset of symptoms (by trained volunteer visits, phone or message services)

If a contact shows symptoms, then restart process
