The following amendments to the Class Rules have been approved to be effective 28 January 2011.

Rule C.9.4 (a) (1)
Amendment: Delete “Replacement blocks have no sheave restrictions” such that the rule now reads as follows:

“C.9.4 MAST
(a) USE
(1) Masts may not be modified from the supplied specification, except that cleats, blocks and fittings from any manufacturer may be replaced in the same position as the standard fitting or as close as structurally possible. Replacement cleats shall be substantially the same size and design. Replacement blocks shall have the same number of sheaves of a similar diameter but shall not alter the weight distribution of the mast. Additional blocks may be used for the control of the vang system, but these must not alter the purchase. See C.9.8(a)(1) and C.9.8(a)(6).”
