INTRODUCTION

PLATU 25 hulls and hull appendages are manufacturer controlled; rigs and sails are measurement controlled.

PLATU 25 hulls and hull appendages shall only be manufactured by builders in the class rules referred to as licensed manufacturers. Equipment is required to comply with the International PLATU 25 Building Specification and is subject to a World Sailing approved manufacturing control system.

PLATU 25 hulls, hull appendages, rigs and sails may, after having left the manufacturer, only be altered to the extent permitted in Section C of the class rules.

Owners and crews should be aware that compliance with rules in Section C is NOT checked as part of the certification process.

Rules regulating the use of equipment during a race are contained in Section C of these class rules, in ERS Part I and in the Racing Rules of Sailing.

This introduction only provides an informal background and the International PLATU 25 Class Rules proper begin on the next page.
PART I – ADMINISTRATION

Section A – General

A.1 LANGUAGE
A.1.1 The official language of the class is English and in case of dispute over translation the English text shall prevail.
A.1.2 The word “shall” is mandatory and the word “may” is permissive.
A.1.3 The term “permanently fastened” shall mean unable to be removed with simple tools, or fixed with glue or rivets.
A.1.4 The term “permanent” for limit marks shall mean unable to be removed and repositioned without destroying them.

A.2 ABBREVIATIONS
A.2.1 WS World Sailing
MNA WS Member National Authority
IPCA International Platu 25 Class Association
FYD Farr Yacht Design
NCA National Class Association
ERS Equipment Rules of Sailing
RRS Racing Rules of Sailing

A.3 AUTHORITIES AND RESPONSIBILITIES
A.3.1 The international authority of the class is WS which shall co-operate with the IPCA in all matters concerning these class rules according to IPCA proposals.
A.3.2 Notwithstanding anything contained herein, the certification authority has the authority to withdraw a certificate and shall do so on the request of WS.
A.3.3 No legal responsibility with respect to these class rules, or accuracy of measurement, rests with:
  WS
  an MNA
  the IPCA
  an NCA
  a Certification Authority, CA
  an official measurer
  No claim arising from these class rules can be entertained

A.4 ADMINISTRATION OF THE CLASS
A.4.1 WS has delegated its administrative functions of the class to IPCA. The IPCA may delegate part or all of its functions, as stated in these class rules, to an NCA.

A.5 WS RULES
A.5.1 These class rules shall be read in conjunction with the ERS.
A.5.2 Except where used in headings, when a term is printed in “bold” the definition in the ERS applies and when a term is printed in “italics” the definition in the RRS applies.
A.6 CLASS RULES VARIATIONS
A.6.1 At World, Continental or Regional Championships the notice of race and sailing instructions may vary these class rules only with the agreement of IPCA and WS.
A.6.2 At National events the notice of race and sailing instructions may vary these class rules only with the agreement of the NCA and the MNA.
A.6.3 A notice of race or sailing instruction may specify additional or alternative safety equipment.

A.7 CLASS RULES AMENDMENTS
A.7.1 Amendments to these class rules shall be proposed by the IPCA to WS for approval, in accordance with the WS regulations.

A.8 CLASS RULES INTERPRETATION
A.8.1 Interpretation of class rules shall be made in accordance with the WS Regulations.

A.9 INTERNATIONAL CLASS FEE AND WS BUILDING PLAQUE
A.9.1 The licensed hull builder shall pay the International Class Fee for each hull built.
A.9.2 The IPCA shall, after having received the International Class Fee for the hull, send the WS Building Plaque to the licensed hull builder.
A.9.3 Rights to build Platu 25 shall rest only with builders duly licensed by FYD / WS and approved by the IPCA.

A.10 SAIL NUMBERS
A.10.1 Sail numbers shall be issued by the NCAs.
A.10.2 Personal Sail numbers are permitted, and they shall be issued by the NCAs.

A.11 HULL CERTIFICATION
A.11.1 A builder certificate (for boats produced after 01/03/2008) shall be delivered with each Platu 25 by the Builder. This certificate confirms that the boat complies with the current class rules and building specifications for hull, deck, keel, rudder, accommodation and deck gear, prior to delivery from builder’s yard.
A.11.2 Hull appendages, spars and rigging are subjected to certification by an official measurer.

A.12 INITIAL HULL CERTIFICATION
A.12.1 For a certificate to be issued to hull not previously certified:
   (a) Certification control shall be carried out by an official measurer who shall complete the appropriate documentation (measurement form)
   (b) The documentation and certification fee, if required, shall be sent to the certification authority
   (c) Upon receipt of a satisfactorily completed documentation and certification fee, if required, the certification authority may issue a certificate.
A.12.2 Certificates shall expire by default 5 years after the date of issue.

A.13 VALIDITY OF CERTIFICATE
A.13.1 A boat certificate becomes invalid upon:
   (a) the change to any items recorded on the hull certificate as required under A.11
   (b) the date of expiry
   (c) withdrawal by the certification authority
   (d) the issue of a new certificate.
A.14  HULL RE-CERTIFICATION
A.14.1  The certification authority may issue a certificate to a previously certified boat:
(a) when it is invalidated under A.13.1(a) or (b), after receipt of the old certificate, and certification fee if required
(b) when it is invalidated under A.13.1 (c), at its discretion
(c) at any change of ownership the measurement certificate is invalidated and shall require a new Measurement certificate
(d) in other cases, by application of the procedure in A.12.

A.15  RETENTION OF CERTIFICATION DOCUMENTATION
A.15.1  The certification authority shall:
(a) retain the original documentation upon which the current certificate is based and give a certified copy to the owner.
(b) upon request, transfer this documentation to the new certification authority if the hull is exported.
Section B – Boat Eligibility

For a boat to be eligible for racing, it shall comply with the rules in this section.

B.1 CLASS RULES AND CERTIFICATION

B.1.1 The boat shall:
   (a) be in compliance with the class rules
   (b) have a valid boat certificate
   (c) have valid certification marks as required by these class rules
   (d) have at least one member of the boat’s NCA as member of the crew.

B.1.2 It is responsibility of the owner to keep the measurement certificate up to date and to ensure that the boat complies at all times with the current class rules and WS rules. The IPCA cannot be held responsible for any accident occurring in connection with application of the present rules, or of any subsequent claim.

B.1.3 Measurement costs are at the owner’s expense. Only official measurers recognized by the IPCA shall measure Platu 25 boats. Instructions to the measurers, if necessary, shall be given by the IPCA.

B.2 CLASS ASSOCIATION MARKINGS

B.2.1 All sails shall carry the Platu 25 class sail button.

B.2.2 All masts shall carry the Platu 25 class mast sticker.
PART II – REQUIREMENTS AND LIMITATIONS

The crew and the boat shall comply with the rules in Part II when racing. In case of conflict, Section C shall prevail.

The rules in Part II are closed class rules. Certification control and equipment inspection shall be carried out in accordance with the ERS except where varied in this Part.

Section C – Conditions for Racing

C.1 GENERAL

C.1.1 RULES
(a) The ERS Part I – Use of Equipment shall apply.

C.2 CREW

C.2.1 LIMITATIONS
(a) The crew shall consist of a minimum of 4 persons.
(b) The number of crew shall not change during a race series
(c) No crew member shall be substituted during an event without the approval of the race committee.

C.3 PERSONAL EQUIPMENT

C.3.1 MANDATORY
(a) The boat shall be equipped with personal buoyancy for each crew member to the minimum standard ISO 12402-5 (Level 50) or equivalent.

C.4 ADVERTISING

C.4.1 LIMITATIONS
Advertising shall only be displayed in accordance with WS Regulation 20 - Advertising Code.

C.5 PORTABLE EQUIPMENT

C.5.1 FOR USE
(a) MANDATORY
Safety Equipment shall include:
(1) One anchor with a total weight of min 8 kg. An optional chain of max 2 kg may be included in the total anchor weight.
(2) 30 metres anchor rope having a diameter of not less than 10 mm.
(3) one bilge bucket of stout construction of minimum capacity 9 litres fitted with a lanyard of 1 meter.
(4) first aid equipment
(5) one fire extinguisher
(6) emergency flares
(7) tool kit which shall include tools capable for disconnecting and severing standing rigging
(b) OPTIONAL
   (1) Electronic sailing equipment, navigation and tactical equipment of any type are permitted.
   (2) Electrical Equipment: A battery of max 18 kg and electrical equipment may be installed. If electrical equipment is installed, the battery shall be fixed on the aft side of the port mast bulkhead (see drawing 1). There is no minimum weight of the electrical equipment and battery. If no electrical equipment is fitted, no battery shall be fitted.
   (3) The two standard accommodation cushions.
   (4) Separate fuel tanks.
   (5) Buoyancy bags.
   (6) Storm jib.

C.5.2 NOT FOR USE
(a) MANDATORY
   (1) Engine: One functional outboard engine shall be on board; The minimum nominal power of the engine is 2.5 hp. The supplied engine bracket shall be bolted at the standard position. If there is no engine bracket, a corrector weight of 1.5 kg shall be fixed in its place. The engine and any corrector weight shall be fixed on the engine bracket in the engine locker or in the same place, below the engine head, if there is no bracket.
   (2) Engine well cover plate and locker covers: The engine well cover plate shall be removable at all times. A hole may be drilled on the cover plate. Fairing the cover plate is permitted. Engine well and engine locker covers may be waterproofed using any method from the interior. The space between the engine well and the engine locker may be closed in a non-permanent way.

C.6 BOAT
C.6.1 WEIGHT

<table>
<thead>
<tr>
<th>The weight of the boat in dry condition</th>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1219 kg</td>
<td></td>
</tr>
</tbody>
</table>

The weight shall be taken excluding sails, outboard engine and all portable equipment as listed in C.5, unless otherwise stated in this rule.

The weight is measured including the following equipment:
   (a) Hull, deck and appendages.
   (b) Standard accommodation including bilge pump.
   (c) Mast and its standard standing rigging.
   (d) Backstay adjustment system.
   (e) 3 halyards (main, genoa, spinnaker).
   (f) One spinnaker pole.
   (g) Pole foreguy and topping lift including blocks.
   (h) Headsail sheets with turning blocks.
   (i) Spinnaker sheets with 4 turning blocks.
   (j) Spinnaker tweakers with 4 blocks.
(k) Main sheet with its 4 blocks.
(l) Boom vang and blocks.
(m) Boom with outhaul, and blocks.
(n) Companionway hatchboard.
(o) Standard deck fittings as in the Platu 25 Deck Plan
(p) All blocks as in the Platu 25 Deck Plan
(q) Battery and electrical system, if installed
(r) Engine bracket or its corrector weight
(s) Standard floorboard
(t) Four bunk hatch covers

C.6.2 CORRECTOR WEIGHTS

(a) Corrector weights, if needed, shall be permanently installed at the locations shown in Drawing 1, with 50% of the weight at position 1 (which is in front), and the remainder split equally between positions 2 (port side aft) and 3 (starboard side aft). The weight shall be indicated on each corrector weight in a clearly visible way for equipment inspection.

![Diagram of boat with corrector weights](image-url)
C.7 HULL

C.7.2. INTERIOR

C.7.2.1 USE

(a) The standard floorboard shall be installed in its intended position.
(b) The four bunk-top hatch covers shall be carried on board and in place.

C.7.3 MODIFICATIONS, MAINTENANCE AND REPAIR

(a) No alterations to the configuration of the hull, deck, interior, keel, rudder, rig or the actual measurements on the Measurement Certificate of a Platu 25 are permitted, unless otherwise stated in these class rules. Any boat showing clear evidence that an attempt has been made to change its shape, or where evidence is available to suggest this, shall have its certificate withdrawn and the matter referred to the IPCA.

(b) It is not permitted to:
   (1) Drill out, core, rebuild, replace materials, grind, plane or relocate standard equipment or parts in any way to reduce weight or to improve pitching moments or to directly or indirectly improve performance.
   (2) Change the shape or outline of the hull, deck, interior structure
   (3) Remove any gelcoat surface except light sanding in preparation for painting.
   (4) Fair-in or remove the bilge pump skin fitting.

(c) Permitted actions:
   (1) Fairing of the flotation line.
   (2) Installation of additional through-hull fittings for added equipment (speed transducer, depth sounder etc.)
   (3) Polishing
   (4) Painting

(d) If any hull moulding is repaired in any other way than described in C.7.3(c), an official measurer shall verify on the certificate that the external shape is the same as before the repair and that no substantial stiffness, or other, advantage has been gained as a result of the repair, in consultation with the class Technical Committee. The official measurer shall also describe the details of the repair on the certificate.

C.8 HULL APPENDAGES

C.8.1 MODIFICATIONS, MAINTENANCE AND REPAIR

(a) Permitted actions:
   (1) The keel may be painted and faired over the cast iron surface, but fairing that removes metal is prohibited.
   (2) Fairing of the hull to keel junction within 200 mm of the flange.
   (3) Rudder fairing.
   (4) Chamfering of trailing edges on keel and rudder
   (5) Line-up of the axis of keel and rudder
   (6) Painting

(b) Routine maintenance such as painting and polishing is permitted without re-measurement and re-certification.
C.9 RIG

C.9.1 USE
(a) Altering the position of the mast at the step and at deck level while racing is not permitted.
(b) Adjustment of shroud and/or forestay tensions and length while racing is not permitted.
(c) Use of any standing rigging permitted in F.6 for other than its intended purpose is not permitted.

C.9.2 LIMITATIONS
(a) Only one set of spars and standing rigging shall be used during an event, except when an item has been lost or damaged beyond repair.

C.10 SAILS

C.10.1 MODIFICATIONS, MAINTENANCE AND REPAIR
(a) Sails shall not be altered in any way except as permitted by these class rules.
(b) During an event sails may be repaired after written permission has been received from the event Technical Committee. These sails shall be checked and if necessary re-certified by an official measurer. Minor repairs, such as taping small holes, are permitted without the above mentioned procedure of permission and re-measurement.

C.10.2 LIMITATIONS
(a) Not more than 1 mainsail, 1 heavy jib, 1 medium jib, 1 light jib, 1 storm jib, 1 spinnaker and 1 spare spinnaker shall be carried aboard.
(b) Not more than 1 mainsail, 1 heavy jib, 1 medium jib, 1 light jib, 1 storm jib and 1 spinnaker shall be used during an event of less than 8 consecutive days, except when a sail has been lost or damaged beyond repair.
(c) An additional spinnaker may be presented for event measurement and carried on board as a spare (as in C.10.2 (a) ), but shall not be used during an event except when the primary spinnaker has been lost or damaged to the point where it cannot be effectively repaired while afloat.

C.10.3 MAINSAIL
(a) IDENTIFICATION
The insignia, national letters and sail numbers shall comply with RRS Appendix G except where prescribed otherwise in these class rules.
(b) USE
The highest visible point of the mainsail, projected at 90° to the mast spar, shall not be set above the lower edge of the mast upper limit mark, and the aft-most visible part of the leech, projected at 90° to the boom spar, shall be forward of the outer point on the boom.

C.10.4 SPINNAKER
(a) IDENTIFICATION
Identification shall comply with RRS Appendix G
Section D – Hull

D.1 PARTS
D.1.1 MANDATORY
(a) Hull shell
(b) Deck

D.2 GENERAL
D.2.1 RULES
(a) The hull shall comply with the IPCA building specification and the class rules in force at the time of initial certification.
(b) All tolerances referred to in these documents are for manufacturing purposes only, and shall not be used for optimization
(c) Moulds for hull shell, deck and interior structure shall be generated from the original tooling of Mac Dell Marine Ltd.

D.2.3 DEFINITIONS
(a) HULL DATUM POINT
The hull datum point (Point A) is on the centreline at the hull to transom junction, as shown in drawing 2.

D.2.4 IDENTIFICATION
(a) The hull shall carry the WS Plaque permanently placed at starboard side, inside the cockpit near the transom.
(b) The builder’s number shall be engraved on the port aft corner of the hull close to and under the sheerline.
D.3 HULL SHELL

D.3.1 CONSTRUCTION

(a) The hull shell shall be built in a FYD approved mould in accordance with the IPCA building specification.

D.4 DECK

D.4.1 CONSTRUCTION

(a) The deck shall be built in a FYD approved mould in accordance with the IPCA building specification.

D.5 ASSEMBLED HULL

D.5.1 FITTINGS

(a) MANDATORY

The deck layout shall comply with the Platu 25 Deck Plan with regard to function, specification and location of deck gear. All deck gear items shown on the Platu 25 Deck Plan are mandatory and shall not be modified unless otherwise permitted in the class rules.

The following fittings shall be positioned in accordance with the Platu 25 Deck Plan:

- **Jib Tracks:** Usable length of clear track measured between end stops shall be min. 440 mm and max. 460 mm. The distance between the centre of the forestay pin hole on the boat and the forward end of usable length on the track on each side of the yacht, shall be min 2890 mm and max 2930 mm. Only one traveller car is permitted on each track.

- **Mainsheet System:** Only one car is permitted on the mainsheet track. Only one swivel base is permitted. No extra cleats are permitted on deck or traveller car for the mainsheet system. Mainsheet shall have a maximum 6:1 purchase. Traveller controls shall have 3:1 purchase. Strops on blocks are permitted.

- **Outhaul:** The outhaul shall be an in-boom max 4:1 purchase led to a cabin top cleat.

- **Main Cunningham:** The main cunningham shall be a max 6:1 purchase led to a cabin top cleat.

- **Vang:** The maximum boom vang purchase shall be max 16:1, led to a cabin top cleat.

- **Foreguy:** The foreguy shall be a 2:1 purchase led aft to a cabin side or top cleat.

- **Spinnaker Tweakers:** The spinnaker tweakers shall be located on existing padeyes.

- **Jib Barber-Hauler:** Jib barber-haulers may pull the clew towards or away from the centreline. Maximum purchase shall be 4:1 and led to a cabin top or side cleat. Extra padeyes for the jib barber-haulers are not permitted.

- **Hiking lines:** The stainless steel wire hiking lines may be tied between pulpit and its aft mounting point such that when pushing down hard on the hiking lines at the mid-point between the two centre stanchions, no part of the hiking line including padding shall touch the deck. The hiking lines may be terminated by rope, as long as the distance bridged by the rope doesn’t exceed 400 mm in length, and the rope construction has the equivalent strength of 3 mm steel wire. On each side a padeye may be mounted on deck near the gunwale for pulling down the hiking lines: It shall be positioned at the midpoint between the aft stanchion and the pushpit +/- 50 mm. The hiking lines shall be attached to the pushpit, being optionally led through the pad eye on deck or shall be terminated at the padeye. The aft stanchion and pushpit may be reinforced.
- The Bilge pump and its 2 m pipe shall be installed as per building specifications. The centre of the hole for the discharge fitting shall be on the port side of the hull shell, at a longitudinal distance of minimum 1775mm and maximum 1825 mm from the Hull Datum Point and at minimum 580mm and maximum 620mm from the sheerline, the latter measured along the hull side.

(b) Optional

- Jib Cunningham system’s. The standard cleats and blocks may be removed from the boat if the system is not used.
Section E – Hull Appendages

E.1 PARTS
E.1.1 MANDATORY
(a) Keel
(b) Rudder

E.2 GENERAL
E.2.1 CERTIFICATION
(a) The builder shall record on the Builder’s declaration that the weight of hull appendages, as measured under the conditions described, is within the allowed weight.
(b) The official measurer shall certify hull appendages by recording measurements in the measurement form.
(c) No certification mark is necessary for hull appendages.

E.3 KEEL
E.3.1 RULES
(a) The keel shall comply with the current class rules.

E.3.3 DEFINITIONS
(a) Point F2 is on the trailing edge of the keel, 660 mm below the hull centreline point set at 3.685 mm from point A measured along the hull (Drawing 3).
(b) Point F1 is on the trailing edge 550 mm above point F2 measured along the keel trailing edge (Drawing 4).
(c) Point F3 is on the trailing edge 300 mm below point F2 measured along the keel trailing edge (Drawing 4).

E.3.4 DIMENSIONS

<table>

Drawing 5 Platu 25 Rudder
Section F – Rig

F.1 PARTS

F.1.1 MANDATORY

(a) Mast
(b) Boom
(c) Standing rigging
(d) Running rigging
(e) Spinnaker pole

F.2 GENERAL

F.2.1 RULES

(a) The spars and their fittings shall comply with the current class rules.
(b) The standing and running rigging shall comply with the current class rules.

F.2.2 MODIFICATIONS, MAINTENANCE AND REPAIR

(a) Spars shall not be altered in any way except as permitted by these class rules.

F.2.3 CERTIFICATION

(a) Certification is required for the mast. The official measurer shall certify it by recording measurements in the measurement form.

F.2.4 DEFINITIONS

(a) The limit marks shall be of a contrasting colour, and with a minimum width of 20 mm, and shall be permanently marked on the spars.

F.2.5 MANUFACTURER

(a) Mast, boom and spinnaker pole including spares and replacements may be produced by any manufacturer.

F.3 MAST

F.3.1 GENERAL

(a) The mast datum point (MDP) is situated at the heel point
(b) The mast spar and spreaders shall be made of aluminium alloy.

F.3.2 CONSTRUCTION

(a) The spar shall include a fixed groove or track which shall be integral with the spar.
(b) The aluminium mast collar shall not be larger than the laminated polyester plinth on the deck. The distance measured from the centre of the forestay pin hole on the bow to the mast at the upper edge of the mast collar shall be max 2620 mm and min 2600 mm
(c) The mast step shall not be larger than the laminated polyester plinth inside the boat
(d) No part of the mast spar shall be outside of the mast step. A stainless steel tie rod wire of minimum diameter 4 mm shall be installed between mast step and deck.
F.3.3 FITTINGS

(a) MANDATORY

(1) Gooseneck
(2) Spinnaker pole fitting
(3) The mast shall have sheave boxes, sheaves, pins and rope (wire is not permitted) halyards for:
   - One main halyard
   - One spinnaker halyard
   - One headsail halyard
   - One topping lift

(4) Attachments for shrouds, forestay
(5) Masthead fitting with attachment for backstay
(6) Two pairs of spreaders
(7) Boom vang attachment

(b) OPTIONAL

(1) One mechanical wind indicator
(2) Navigation lights and cable
(3) A batten may be fixed to the backstay crane for the purpose of lifting a lightly loaded backstay above the top batten. This shall not change the attachment point of the backstay, nor alter the line of the backstay under load between the attachment points.
(4) Instrument brackets
(5) A positive stopper device for the mainsail halyard, to enable application of C.10.3.b

F.3.4 DIMENSIONS

F.3.5 WEIGHTS

The assembled mast with all normal hardware in place including navigation lights and cables if permanently installed and instrument brackets below the lower point when permanently fastened, but without

- Mast Step
- Wind indicator
- Antennas
- Compass, instrument displays and associated cables

shall have a **tip weight** of minimum 16,5 kg.

A lead **corrector weight** of maximum 2,5 kg to shall be permanently fastened when necessary at any location on the mast above the **upper limit mark**.

The **mast weight**, including the tip **corrector weight** if present, shall not be less than 39 kg. An additional lead corrector weight to reach the min **mast weight** shall be permanently fastened at the height of the **lower point**.

F.4 BOOM

F.4.1 MATERIALS

The **spar** shall be made of aluminium

F.4.3 DIMENSIONS

<table>
<thead>
<tr>
<th></th>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Boom spar cross section</strong></td>

</tr>
</tbody>
</table>

Except within 150 mm from each spar end, the boom section shall be constant

| **Outer limit mark width** | 20mm |
| **Outer point distance**   | 3650mm |

F.5 SPINNAKER POLE

F.5.1 MATERIALS

The **spinnaker pole** spar shall be made of aluminium and of constant section.

F.5.2 DIMENSIONS

<table>
<thead>
<tr>

</tbody>
</table>

F.6 STANDING RIGGING

F.6.1 MATERIALS

(a) The **standing rigging** shall be of 1x19 stainless steel round wire. Dyform type wire is not permitted.
(b) **Backstay** may be of stainless steel wire or rope.

F.6.2 CONSTRUCTION
- A Head foil system is not permitted on the forestay
- The **Backstay** control system shall have an 8:1 minimum and 16:1 maximum purchase, and shall be led to each side of cockpit near the helmsman.

F.6.3 FITTINGS
(a) MANDATORY
   (1) Forestay rigging link consisting of plate, holes and pins. No other method of forestay adjustment is permitted.
   (2) Shroud rigging screw adjusters.

F.6.4 DIMENSIONS

Minimum wire diameters are

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

F.7 RUNNING RIGGING

F.7.1 MATERIALS
(a) Rope halyard materials are optional.

F.7.2 CONSTRUCTION
(a) MANDATORY
   (1) Mainsail halyard: it shall be led below deck to a cleat mounted on the mast spar near the heel.
   (2) Headsail halyard: it shall be led aft to a cabin top cleat
   (3) Spinnaker halyard: the spinnaker halyard cleat shall be located on the mast spar. An extra cabin top cleat is permitted.
   (4) Topping lift: the topping lift shall lead aft to a cabin top cleat.

(b) OPTIONAL
   (1) Mainsail Cunningham line
   (2) Mainsailouthaul
   (3) Headsail Cunningham line
   (4) Single line headsail Barber haulers capable of modifying the sheeting angle in one direction only

F.7.3 FITTINGS
(a) OPTIONAL
   (1) One block or eye in each headsail for Barber hauler to run on headsail sheet
   (2) One eye or block in each spinnaker sheet for Barber hauler to run on spinnaker sheet or guy
Section G – Sails

G.1 PARTS

G.1.1 MANDATORY
(a) Mainsail
(b) Headsails

G.1.2 OPTIONAL
(a) Spinnaker

G.2 GENERAL

G.2.1 RULES
(a) Sails shall be constructed and measured in accordance with ERS except for reinforcements, which are free, and for all definitions outlined in the present class rules.
(b) Sails shall comply with the current class rules.
(c) The following applies to headsails:
   (i) When the clew or the tack has a cut-out, the corner point shall be found by extending the associated sail edges beyond the cut-out starting points and then finding the intersection point.
   (ii) An FRP batten of uniform stiffness and approximately 2 mm in thickness shall be used to create sail edge extensions.
   (iii) Not more than 200mm of the batten’s length shall be used for sail edge extension purposes.
   (iv) The batten shall be held at points outside the part used for extensions.
   (v) The batten shall be positioned with one point approximately at the expected corner point and a second point touching the sail edge to be extended at not more than 200mm away from the first point.
   (vi) If the sail edge is curved, the batten shall be bent to follow the sail edge between the cut-out starting point and the second point described in (v).
   (vii) The procedure above shall be repeated to find the other sail edge extension.
   (viii) Rule G.2.1(c) modifies ERS H.5.4.

G.2.2 CERTIFICATION
(a) The official measurer shall certify mainsails and headsails in the tack and spinnakers in the head and shall sign and date the certification mark. Sails may be certified without identification on them.
(b) Sails shall carry the sail button/sticker issued by IPCA attesting that the class fee has been paid, and located for mainsails and headsails in the tack and spinnakers in the head.

G.2.3 SAILMAKER
(a) The sailmaker is optional.

G.3 MAINSAIL

G.3.1 IDENTIFICATION
The class insignia is shown in Drawing 6.
G.3.2 MATERIALS
Dacron and/or Mylar and polyester fibre laminated ply is permitted.

G.3.3 CONSTRUCTION
(a) Maximum of 4 removable battens are permitted.
(b) One or more reefs are permitted
(c) The following are permitted: Stitching, glues, tapes, bolt ropes, corner eyes, headboard with fixings, Cunningham eye or pulley, batten pockets, batten pocket patches, batten pocket elastic, batten pocket end caps, mast and boom slides, leech lines with cleat, windows of free size, tell tales, sail shape indicator stripes and items as permitted or prescribed by other applicable rules.
(d) The leech shall not extend aft of straight lines between:
   - the aft head point and the intersection of the leech and the upper edge of the nearest batten pocket,
   - the intersection of the leech and the lower edge of a batten pocket and the intersection of the leech and the upper edge of an adjacent batten pocket below,
   - the clew point and the intersection of the leech and the lower edge of the nearest batten pocket.

G.4 HEADSAILS

G.4.1 MATERIALS
Dacron and/or Mylar and polyester fibre laminated ply is permitted for the light and medium Jibs.
Only Dacron is permitted for the heavy and storm jibs.
Windows may be fitted only in the light and medium jibs

G.4.2 CONSTRUCTION
(a) The construction shall be: soft sail, single ply sail.
(b) The leech shall not extend beyond a straight line from the aft head point to the clew point.
(c) The following are permitted: Stitching, glues, tapes, corner eyes, hanks, batten pockets, batten pocket elastic, batten pocket patches, batten pocket end caps, leech line with cleat, one window, tell tales, sail shape indicator stripes, jib Cunningham eye and items as permitted or prescribed by other applicable rules. Battens shall be removable.

<td></td>
<td>unlimited</td>
</tr>
</tbody>
</table>
The centreline of the **batten pockets** shall intersect the leech within 100 mm of the **quarter, mid and three-quarter leech points**. Windows, except for tell tales, are prohibited.

G.4.6 **DIMENSIONS STORM JIB**

The storm jib shall be made of polyester fibre woven ply. Battens and windows are not permitted. The Storm jib area shall not be greater than 5.0 m².

G.5 **SYMMETRIC SPINNAKER**

G.5.1 **MATERIALS**

Spinnakers shall be made of Nylon or polyester **woven ply**

G.5.2 **CONSTRUCTION**

(a) The construction shall be: **soft sail, single ply sail**.

(b) The following are permitted: Stitching, glues, tapes, corner eyes, recovery line eyes, tell tales and items as permitted or prescribed by other applicable rules.

(c) The **body of the sail** shall consist of the same **woven ply** throughout. This limitation does not apply for the color.

G.5.3 **DIMENSIONS**
