High Speed Rules Working Party Report to Racing Rules Committee
October 2018

2019 continues to have been about the working party receiving feedback from organisers, officials and sailors using the High Speed Rules.

Feedback

The Working Party continues to receive positive feedback from organising authorities and classes that use the test rules.

The 3 sets of changes that are used to form the High Speed Rules have not been changed in 2019.

Successes

The whole package of rule changes continues to be accepted by the high speed classes that use these rules.

Future

The Working Party considered preparing a submission to make these rules an appendix that is not published in the RRS, however with the new RRS being finalised, and the opportunity to learn from the experiences with more foiling monohulls, the Working Party would like to keep these as test rules with the aim to make changes once the 2021-2024 RRS have been settled.

The changes can then be formalised as an appendix as per Regulation 28.1.5.
