Offshore Special Regulations – 4.26.4(i)

Inner Stay for the Storm Jib

A submission from the Chairman, Special Regulations Sub-Committee

Proposal

Add to the end of the existing rule:

<table>
<thead>
<tr>
<th>4.26.4</th>
<th>The following shall be provided:—</th>
</tr>
</thead>
<tbody>
<tr>
<td>(k)</td>
<td>It is strongly recommended that an inner forestay is provided either permanently installed or readily set up, on which to set the storm jib.</td>
</tr>
</tbody>
</table>

Add diagram: (sails to be blocked in full colour)

Current Position

Following the deletion of repeated text in submission SR04-11, 4.26.4 (i) is a spare number.
Reason:

The Storm Sail Working Party considered that advice should be included strongly recommending the value of setting a storm jib on an inner forestay.

Oceanic and Offshore Committee November 2010 minute:
“..It was agreed that the submissions resulting from the working party(apart from any regarding point 6) are not expected to be re-debated as this subject has now received considerable attention.

Decision:
It was agreed that the Chairman and Vice Chairman of the Special Regulations Sub-committee should prepare submissions to implement the recommendations in the OSR 2012. “
