Copyright
When reprinting these regulations National Authorities and Race Organizers should:-

- request copyright permission from World Sailing and ORC Ltd (normally given free of charge)
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, amendments 2003-2020 © World Sailing Limited)
- make any amendments by deleting contrary provisions and indicating that changes have been made
- supply a copy of the reprint to each of World Sailing and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the World Sailing web site www.sailing.org/specialregs

Language & Abbreviations Used
Mo - Monohull
Mu - Multihull
" ** " means the item applies to all types of boat in all Categories except 5 for which see Appendix B or 6 for which see Appendix C.

RED TYPE indicates significant changes in 2020

Guidance notes and recommendations have been removed from the Regulations and are available on www.sailing.org/documents/offshorespecialregs/index.php

The use of the masculine gender shall be taken to mean either gender

Administration

The Offshore Special Regulation are administered by the World Sailing Special Regulation Sub-Committee whose terms of reference are as follows:

World Sailing Regulation 6.9.8.3 - The Special Regulations Sub-Committee shall:

(a) be responsible for the maintenance, revision and changes to the World Sailing Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@sailing.org

SECTION 1 - FUNDAMENTAL AND DEFINITIONS

1.01 Purpose and Use

** 1.01.1 The purpose of the Offshore Special Regulations (OSR) is to establish uniform minimum equipment, accommodation and training standards for monohull and multihull (excluding proa) boats racing offshore.

** 1.01.2 The OSR do not replace, but rather supplement, the requirements of governmental authority, Classification Society certification, the Racing Rules of Sailing (RRS), Equipment Rules of Sailing (ERS), class rules and Rating Systems.

** 1.01.3 Use of the OSR does not guarantee total safety of the boat and her crew. Particular attention is drawn to the description of OSRs for inshore racing which includes that adequate shelter and or effective rescue is available all
1.02 Responsibility of Person in Charge

1.02.1 Under RRS 4 the responsibility for a boat’s decision to participate in a race or continue racing is hers alone. The safety of a boat and her crew is the sole and inescapable responsibility of the Person in Charge who shall do his best to ensure that the boat is fully found, thoroughly seaworthy and manned by an experienced and appropriately trained crew who are physically fit to face bad weather. The person in charge shall also assign a person to take over his responsibilities in the event of his incapacitation.

1.02.2 Neither the establishment of the OSR, nor their use by Organizing Authorities, nor the inspection of a boat under the OSR in any way limits or reduces the complete and unlimited responsibility of the Person in Charge.

1.02.3 By participating in a race conducted under the OSR, the person in charge, each competitor and boat owner agrees to reasonably cooperate with the organizing authority and World Sailing in the development of an independent incident report as specified in 2.02

</table>
ITU International Telecommunications Union
Jackstay A securely fastened webbing or rope which permits a crewmember to move from one part of the boat to another without having to unclip a safety harness tether.
LH Hull Length as defined by the ERS
Lifeline Rope or wire line rigged as guardrail / guardline around the deck
LSA IMO International Life-Saving Appliance Code
LWL (Length of) loaded waterline
Monohull A boat with one hull
Moveable Material carried for the sole purpose of increasing weight and/or influencing stability and/or trim and which may be moved transversely but not varied in weight while a boat is racing
Multihull A boat with more than one hull
Open Cockpit A cockpit that is not a Contained Cockpit.
ORC Offshore Racing Congress (formerly Offshore Racing Council)
OSR Offshore Special Regulation(s)
Permanently The item is effectively built-in by e.g. bolting, welding, glassing etc. and may not be removed for or during racing.
PLB Personal Locator Beacon
Primary Month & Year of first launch of the first boat of the production series or first launch of a non-series boat
Proa Asymmetric Catamaran
Rode Rope, chain, or a combination of both, which is used to connect an anchor to the boat.
RRS ISAF - Racing Rules of Sailing
Safety Line A tether used to connect a safety harness to a strong point
SAR Search and Rescue
SART Search and Rescue Transponder
Securely Held strongly in place by a method (e.g. rope lashings, wing-nuts) which will safely retain the fastened object in severe conditions including a 180° capsize and allows for the item to be removed and replaced during racing
SOLAS Safety of Life at Sea Convention
SSS The Safety and Stability Screening numeral
Static Ballast Material carried for the sole purpose of increasing weight and/or influencing stability and/or trim and which is not moved or varied in weight while a boat is racing
Static Safety Line A safety line (usually shorter than a safety line carried with a harness) kept clipped on at a work-station
STIX ISO 12217-2 Stability Index
Variable Ballast Water carried for the sole purpose of influencing stability and/or trim and which may be varied in weight and/or moved while a boat is racing.
Waterline The water surface when the boat is floating in measurement trim
World Sailing formerly the International Sailing Federation or ISAF

** 1.03.2 The words "shall" and "must" are mandatory, and "should" and "may" are permissive.

** 1.03.3 The word "yacht" shall be taken as fully interchangeable with the word "boat".

SECTION 2 - APPLICATION & GENERAL REQUIREMENTS

2.01 Categories of Events

** 2.01 Organizing Authorities shall select from one of the following categories and may modify the OSR to suit local conditions

2.01.2 Category 1

MoMu1 Races of long distance and well offshore, where boats must be completely self-sufficient for extended periods of time, capable of withstanding heavy storms and prepared to meet serious emergencies without the expectation of outside assistance

2.02 Incident Reporting

2.02 The Organizing Authority of a race will establish whether any incidents
occurred, which if reported would be likely to be relevant to evolving the Offshore Special Regulations, the plan review process, or in increasing safety. The Organizing Authority will follow any guidelines issued by World Sailing concerning incident reporting.

2.03 Inspection
2.03 A boat may be inspected at any time. If she fails to comply with the OSR her entry may be rejected or she will be subject to protest

2.04 General Requirements
2.04.1 All equipment required by OSR shall:
2.04.2

SECTION 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT
3.01 Strength of Build and Rig
3.01.1 Properly rigged, fully seaworthy and shall meet the OSR
3.01.2 Equipped with shrouds and at least one forestay that shall remain connected to the mast and the boat while racing

3.02 Watertight and Structural Integrity of a Boat
3.02.1 Essentially watertight and all openings shall be capable of being immediately secured. Centreboard, daggerboard trunks and the like shall not open into the interior of a hull except via a watertight maintenance hatch with the opening entirely above the Waterline

MoMu0,1,2 3.03.2 A monohull with Primary Launch between 1987 and 2010, and all multihulls, shall have been designed, built, maintained, modified or repaired in accordance with the requirements of:
MoMu0,1,2  c) the EC Recreational Craft Directive for Category A having obtained the CE mark, or
MoMu0,1,2  d) ISO 12215 Category A, with written statements signed by the designer and builder confirming that they have respectively designed and built the boat in accordance with the ISO standard, and
MoMu0,1,2  e) have written statements or approvals in accordance with a), b) or c) and d) above for all significant repairs or modifications to the hull, deck, coach roof, keel or appendages, on board, except
MoMu0,1,2  f) that a race organizer or class rules may accept, when that described in a), b), c), d) or e) above is not available, the signed statement by a naval architect or other person familiar with the standards listed above that the boat fulfils these requirements

3.05 Stability and Flotation - Multihulls
Mu0,1,2,3,4 3.05.1 Watertight bulkheads and compartments (which may include permanently installed flotation material) in each hull, to ensure that the boat is effectively unsinkable and capable of floating in a stable position with at least half the length of one hull flooded (see OSR 3.13.2)
Mu0,1,2,3,4 3.05.2 Transverse watertight bulkheads at intervals of not more than 4 m (13’-3”) in every hull without accommodation if with a First Launch after 1998
Mu0,1,2,3,4 3.05.3 Designed and built to resist capsize

3.07 Exits and Escape Hatches - Multihulls
3.07.1 Exits
Mu0,1,2,3 3.07.1 At least two exits in each hull which contains accommodations
3.07.2 Escape Hatches, Underside Clipping Points & Handholds
Mu0,1,2,3,4 a) If 12 m (39’-4”) LH and greater each hull which contains accommodation:
Mu0,1,2,3,4 i an escape hatch for access to and from the hull in the event of an inversion;
Mu0,1,2,3,4 ii a minimum clearance diameter through each escape hatch of 450 mm (18”) or when an escape hatch is not circular, sufficient clearance to allow a
crewmember to pass through fully clothed on boats if First Launch after 2002
each escape hatch above the waterline when the boat is inverted;
each escape hatch at or near the midships station if First Launch after 2000
each escape hatch on the side nearest the vessel’s central axis for a catamaran if First Launch after 2002
3.07.2
b) if a trimaran at least two escape hatches in compliance with the dimensions in
Mu0,1,2,3,4
OSR 3.07.2 a) ii if 12 m (39'4") LH and greater if First Launch after 2002
Mu0,1
b) if a trimaran at least one escape hatch in compliance with the dimensions in
Mu0,1,2,3,4
c) OSR 3.07.2 a) ii if less than 12 m (39'4") LH if First Launch after 2002
c) each escape hatch shall have been open both from inside and outside within
Mu0,1,2,3,4
6 months prior to the race
Mu0,1,2,3,4
appropriate handholds/clipping points on the underside sufficient for all crew
Mu0,1,2,3,4
d) (on a trimaran these shall be around the central hull)
e) a catamaran with a central nacelle first launched after 2002 shall have on the
Mu0,1,2,3,4
underside around the central nacelle, handholds of sufficient capacity to enable
Mu0,1,2,3,4
all persons on board to hold on and/or clip on securely
3.08 Hatches & Companionways
** 3.08.1 Hatch covers forward of the maximum beam station shall not open toward the
Mu0,1,2,3,4
interior of the boat, except hatches in the side of a coachroof or ports having
Mu0,1,2,3,4
an area of less than 0.071 m² (110 in²)
** 3.08.2 A hatch, including a hatch over a locker shall be:
** a) permanently attached and capable of being firmly shut immediately and
Mu0,1,2,3,4
remaining firmly shut in a 180° capsize
3.08.3 Hatches not conforming with 3.08.1 and 3.08.2 shall be clearly labelled and
Mu0,1,2,3,4
used in accordance with the following instruction “NOT TO BE OPENED AT
Mu0,1,2,3,4
SEA”
** 3.08.4 Companionway hatches:
** a) fitted with a strong securing arrangement which shall be operable from the
Mu0,1,2,3,4
exterior and interior even when the boat is inverted
** b) blocking devices:
** i capable of being retained in position with the hatch open or shut
** ii secured to the boat (e.g. by lanyard) for the duration of the race
** iii permit exit in the event of inversion
Mu0,1,2,3,4
3.08.7 if a multihull with a companionway hatch extending below the local sheerline
Mu0,1,2,3,4
either:
Mu0,1,2,3,4
a) have a minimum sill height of 300 mm (12") and be capable of being blocked
Mu0,1,2,3
off up to the level of the local sheerline whilst giving access to the interior with
Mu0,1,2,3
the blocking device(s) in place; or
Mu0,1,2,3
b) be in compliance with ISO 11812 to design category A
3.09 Cockpits
** 3.09.1 Cockpits that self-drain quickly by gravity at all angles of heel and are
Mu0,1,2,3
permanently incorporated as an integral part of the boat
** 3.09.2 A cockpit sole at least 2% LWL above the waterline (or in IMS boats with First
Mu0,1,2,3
Launch before 2003, at least 2% L above the waterline)
** 3.09.3 A bow, lateral, central or stern well is a cockpit for the purposes of OSR 3.09
** 3.09.4 Cockpit Volume
** The maximum combined volume below lowest coamings of all contained
Mu0,1,2,3
cockpits shall be:
Extract
3.09.5 Cockpit Drains
** The cockpit drain cross section area of unobstructed openings (after allowance for
Mu0,1,2,3
screens if fitted) shall be at least that of:
** a) 2 x 25 mm (1") diameter or equivalent for a boat less than 8.5 m (28') LH
** b) 4 x 20 mm (3/4") diameter or equivalent for a boat 8.5 m (28') LH or greater
3.10 Sea Cocks or Valves

Permanently installed sea cocks or valves on all through-hull openings below the waterline except for integral deck scuppers and instrument through-hulls.

3.11 Sheet Winches

Sheet winches mounted in such a way that an operator is not required to be substantially below deck.

3.12 Mast Step

The heel of a keel stepped mast securely fastened to the mast step or adjoining structure.

3.13 Watertight Bulkheads

Either a watertight “crash” bulkhead within 15% of LH from the bow and abaft the forward end of LWL, or permanently installed closed-cell foam buoyancy effectively filling the forward 30% LH of the hull.

Any required watertight bulkhead to be strongly built to take a full head of water pressure without allowing any leakage into the adjacent compartment.

3.14 Pulpits, Stanchions, Lifelines

The perimeter of the deck surrounded by system of lifelines and pulpits as follows:

- Continuous lifelines fixed only at (or near) the bow and stern. However a gate on each side of a boat is permitted. Except at its end fittings and at gates, the movement of a lifeline in a fore-and-aft direction shall not be constrained. Temporary sleeving shall not modify tension in the lifeline.

- Minimum heights of lifelines and pulpit rails above the working deck and vertical openings:
  - Upper: 600 mm (24”)
  - Intermediate: 230 mm (9”)
  - Vertical opening: no greater than 380 mm (15”) except that on a boat with a Primary Launch before 1993 where it shall be no greater than 560 mm (22”)

- Lifelines permanently supported at intervals of not more than 2.2 m (7'-2 1/2“) and shall not pass outboard of supporting stanchions.

- Pulpit and stanchion bases permanently installed with pulpits and stanchions mechanically retained in their bases.

- The outside of pulpit and stanchion base tubes no further inboard from the edge of the working deck than 5% of maximum beam or 150 mm (6”), whichever is greater, nor further outboard than the edge of the working deck.

- Stanchions straight and vertical except that:
  - Within the first 50 mm (2”) from the deck, stanchions shall not be displaced horizontally from the point at which they emerge from the deck or stanchion base by more than 10 mm (3/8”)
  - Stanchions may be angled to not more than 10° from vertical at any point above 50 mm (2”) from the deck.

- A bow pulpit may be open provided the opening between the pulpit and any part of the boat does not exceed 360 mm (14”).

Figure 2 - Diagram Showing Pulpit Opening
Lifelines may terminate at or pass through adequately braced stanchions set inside and overlapping the bow pulpit.

When a deflecting force of 4 kg (8.8 #) is applied to a lifeline at the mid-point of the longest span between supports that are aft of the mast, the deflection shall not exceed:

- 50 mm (2") for an upper or single lifeline
- 120 mm (4 ¾") for an intermediate lifeline

**3.14.2 Special Requirements for Pulpits, Stanchions, Lifelines on Multihulls**

When on a boat it is impractical to precisely follow OSR regarding pulpits, stanchions, lifelines, the regulations for monohulls shall be followed as closely as possible.

**3.14.6 Lifeline Specifications**

- Stranded stainless steel wire
- HMPE

The minimum diameter is specified in table 8 below.

- Stainless steel lifelines shall be uncoated and used without close-fitting sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection.
- A lanyard of synthetic rope may be used to secure lifelines provided the gap it closes does not exceed 100 mm (4"). This lanyard shall be replaced annually.
- All components of the lifeline enclosure system shall have a breaking strength no less than the lifeline.

When HMPE is used, it shall be protected from chafe and spliced in accordance with the manufacturer's recommended procedures.

<table>

**3.15 Multihull Nets or Trampolines**

The words "net" and "trampoline" are interchangeable. A net shall be:

- Essentially horizontal
- Made from durable woven webbing, water permeable fabric, or mesh with openings not larger than 5 cm (2") in any dimension. Attachment points shall be planned to avoid chafe. The junction between a net and a boat shall present no risk of foot trapping.
- Solidly fixed at regular intervals on transverse and longitudinal support lines and shall be fine-stitched to a bolt rope.
- Able to carry the full weight of the crew either in normal working conditions at sea or in case of capsize when the boat is inverted.

**3.15.2 Trimarans with Double Crossbeams**

A trimaran with double crossbeams shall have nets on each side covering:

- The area formed by the crossbeams, central hull and outriggers
- The triangles formed by the aft end of the central pulpit, the mid-point of each forward crossbeam, and the intersection of the crossbeam and the central hull
Mu0,1,2,3,4 3.15.2 the triangles formed by the aftermost part of the cockpit or steering position (whichever is furthest aft), the mid-point of each after crossbeam, and the intersection of the crossbeam and the central hull; except that:-
Mu0,1,2,3,4 3.15.2 OSR 3.15.2(c) is not a requirement when cockpit coamings and/or lifelines are present which comply with the minimum height requirements in OSR 3.14
Mu0,1,2,3,4 3.15.3 **Trimarans with Single Crossbeams**
Mu0,1,2,3,4 3.15.3 A trimaran with a single crossbeam shall have nets between the central hull and each outrigger on each side between two straight lines from the intersection of the crossbeam and the outrigger, respectively to the aft end of the pulpit on the central hull, and to the aftermost point of the cockpit or steering position on the central hull (whichever is furthest aft)

Mu0,1,2,3,4 3.16 **Catamarans**
Mu0,1,2,3,4 3.16.1 A catamaran shall have nets covering the area defined:
Mu0,1,2,3,4 3.16.1 a) laterally by the hulls; and
Mu0,1,2,3,4 3.16.2 b) longitudinally by transverse stations through the forestay base, and the aftermost point of the boom lying fore and aft. However, a catamaran with a central nacelle (non-immersed) may satisfy the regulations for a trimaran

3.18 **Toilet**

3.19 **Bunks**

3.20 **Cooking Facilities**

3.21 **Drinking Water Tanks & Drinking Water**
3.21.1 **Drinking Water Tanks**
MoMu1 3.21.1 Permanently installed delivery pump and water tanks dividing the water supply into at least two compartments
3.21.3 **Emergency Drinking Water**
MoMu1,2,3 3.21.3 At least 9 l (2.4 US Gal) of drinking water for emergency use in a dedicated and sealed container or container(s)

3.22 **Hand Holds**

3.23 **Bilge Pumps and Buckets**
3.23.1 a) two strong buckets, each with a lanyard and of at least 9 l (2.4 US Gal) capacity
Mo3Mu0,1,2 3.23.1 b) one permanently installed manual bilge pump
Mu0,1,2,3,4 3.23.1 c) provision to pump out all watertight compartments (except those filled with impermeable buoyancy).
3.23.2 All required permanently installed bilge pumps shall be operable with all cockpit seats, hatches and companionways shut and with permanently installed discharge pipe(s) of sufficient capacity
3.23.3 Bilge pumps shall not be connected to cockpit drains and shall not discharge into a Closed Cockpit
3.23.4 Bilge pumps shall be readily accessible for maintenance and for clearing out debris
3.23.5 All removable bilge pump handles retained by a lanyard

3.24 **Compass**
MoMu0,1,2,3 3.24 a) Marine magnetic compass capable of being used as a steering compass:
MoMu0,1,2,3,4 3.24 b) Permanently installed marine magnetic steering compass, independent of any power supply, correctly adjusted with deviation card
MoMu0,1,2,3 3.24 c) a second compass which may be hand-held and/or electronic

3.25 **Halyards.**
3.25 a) A minimum of two halyards, each capable of hoisting a sail, on each mast
MoMu0,1,2,3 3.25 b) No halyard shall be locked, lashed or otherwise secured to the mast in a way that requires a person to go aloft in order to lower a sail in a controlled manner, except for a headsail in use with a furling device.
3.27 Navigation Lights

3.27.1 that conform to the International Regulations for Preventing Collisions at Sea (Part C and Technical Annex I) and shall be exhibited as required by those regulations.

** 3.27.2 mounted above sheerline and so that they will not be masked by sails or the heeling of the boat

MoMu0,1,2,3 3.27.3 reserve lights having the same specifications as above, and that can be powered independently

** 3.27.4 spare bulbs (not required for LED)

3.28 Engines, Generators, Fuel

3.28.1 engines and associated systems installed in accordance with their manufacturers’ guidelines and suitable for the size and intended use of the boat

MoMu0,1,2,3 3.28.1 an engine which provides a minimum speed in knots of (1.8 x √LWL in metres) or (√ LWL in feet)

Mu1,2,3 3.28.1 inboard engine, however if less than 12.0 m (39’-4”) LH either an inboard engine, or an outboard engine together with permanently installed power supply systems

** 3.28.1 an inboard combustion engine shall have a permanently installed exhaust, cooling system, fuel supply, fuel tank(s) and shall have adequate heavy weather protection

** 3.28.1 an inboard electrical engine, when fitted, shall be provided with a permanently installed power supply, adequate heavy weather protection and have an engine control system.

3.28.2 Generator

** 3.28.2 If an optional generator separate from the propulsion engine is carried, it shall be installed in accordance with the manufacturer’s guidelines

3.28.3 Liquid Fuel Systems

MoMu0,1,2,3 3.28.3 All fuel tanks for storage of liquid fuels shall be rigid (but may have permanently installed flexible linings) and shall have a shutoff valve

MoMu0,1,2,3 3.28.3 At the start a boat with a combustion engine shall carry sufficient fuel to meet charging requirements for the duration of the race and to motor at the above minimum speed for at least 5 hours

3.28.4 Battery Systems

MoMu0,1,2,3 3.28.4 a dedicated engine/generator starting battery when an electric starter is the only method for starting the engine and/or separate generator

** 3.28.4 batteries installed after 2011 shall be of the sealed type from which liquid electrolyte cannot escape

** 3.28.4 At the start a boat with an electric engine shall carry sufficient capacity to meet electrical requirements for the duration of the race and to motor at the above minimum speed for at least 5 hours

3.29 Communications Equipment, GPS, Radar, AIS

MoMu0,1,2,3 3.29.1 a marine radio transceiver with an emergency antenna when the regular antenna depends upon the mast

MoMu0,1,2,3 3.29.2 if the marine radio transceiver is a VHF:

MoMu0,1,2,3 3.29.2 a minimum rated output power of 25 W

MoMu0,1,2 3.29.2 a masthead antenna not less than 38 cm (15”) in length and co-axial feeder cable with not more than 40% power loss

MoMu1,2,3 3.29.2 be DSC capable if installed after 2015

MoMu1,2,3 3.29.2 DSC capable VHF transceivers shall be programmed with an assigned MMSI (unique to the boat), be connected to a GPS receiver and be capable of making distress alert calls as well as sending and receiving a DSC position report with another DSC equipped station

MoMu1 3.29.3 One hand-held satellite telephone, watertight or with waterproof cover and internal battery.
MoMu1,2,3 3.29.5 a hand-held marine VHF transceiver, watertight or with a waterproof cover. When not in use to be stowed in a grab bag or emergency container (see OSR 4.21)

** 3.29.6 a second radio receiver, which may be the hand held VHF in 3.29.5 above, capable of receiving weather bulletins

Mo0,1,2,3 3.29.13 an AIS Transponder which either:

- MoMu0,1,2,3 3.29.13 shares the masthead VHF antenna via a low loss AIS antenna splitter; or
- MoMu0,1,2,3 3.29.13 has a dedicated AIS antenna not less than 38 cm (15") in length mounted with its base not less than 3 m (10") above the Waterline and co-axial feeder cable with not more than 40% power loss

** 3.29.6 a second radio receiver, which may be the handheld VHF in 3.29.5 above, capable of receiving weather bulletins

MoMu0,1,2,3 3.29.13 an AIS Transponder which either:

- shares the masthead VHF antenna via a low loss AIS antenna splitter; or
- has a dedicated AIS antenna not less than 38 cm (15") in length mounted with its base not less than 3 m (10") above the Waterline and co-axial feeder cable with not more than 40% power loss

SECTION 4 - PORTABLE EQUIPMENT

A boat shall have:

4.01 Sail Letters & Numbers

** 4.01.1 Identification on sails which complies with RRS 77 and RRS Appendix G

MoMu0,1,2,3 4.01.2 An alternative means of displaying identification as required under RRS Appendix G for a mainsail, to be displayed when none of the numbered sails are set

4.02 Search and Rescue Visibility

Mo1,Mu1,2 4.02.1 A 1 m² (11 ft²) solid area of highly-visible pink, orange or yellow capable of being displayed on the coachroof and/or deck.

Mu0,1,2,3,4 4.02.2 A 1 m² (11 ft²) area of highly-visible pink, orange or yellow showing when the boat is inverted

4.03 Soft Wood Plugs

** 4.03 A tapered soft wood plug stowed adjacent to every through-hull opening

4.04 Jackstays and Clipping Points

MoMu0,1,2,3 4.04.1 Permanently Installed fittings for jackstay ends and clipping points

MoMu0,1,2,3 4.04.2 Jackstays which shall:

- MoMu0,1,2,3 4.04.2 a) enable a crewmember to move readily between the working areas on deck and the cockpit(s) with the minimum of clipping and unclipping operations
- MoMu0,1,2,3 4.04.2 b) have a breaking strength of 2040 kg (4500#) and be uncoated and non-sleeved stainless steel 1 x 19 wire of minimum diameter 5 mm (3/16"), webbing or HMPE rope
- MoMu0,1,2,3 4.04.2 c) Clipping points which shall:
- MoMu0,1,2,3 4.04.3 be adjacent to stations such as the helm, sheet winches and masts, where crewmembers work
- MoMu0,1,2,3 4.04.3 a) enable a crewmember to clip on before coming on deck and unclip after going below
- MoMu0,1,2,3 4.04.3 b) enable two-thirds of the crew to be simultaneously clipped on without depending on jackstays
- MoMu0,1,2,3 4.04.3 c) on a trimaran with a rudder on the outrigger, permit a crewmember to repair the steering mechanism whilst attached to a clipping point

4.05 Fire Fighting Equipment

** 4.05.1 A fire blanket adjacent to every cooking device with an open flame

MoMu1,2,3 4.05.2 2 fire extinguishers, each with 2 kg of dry powder or equivalent, in different parts of the boat

4.06 Anchors

MoMu1,2,3 4.06.2 2 un-modified anchors that meet the anchor manufacturer’s recommendation based on the boat’s dimensions with suitable combination of chain and rope, ready for immediate assembly, and ready for deployment within 5 minutes except that for a boat less than 8.5 m (28') LH there shall be 1 anchor meeting the same criteria.

4.07 Flashlights and Searchlights

** 4.07.1 Watertight lights with spare batteries and bulbs as follows:

MoMu0,1,2,3 4.07.1 a searchlight, suitable for searching for a person overboard at night and for collision avoidance
4.07.1 a flashlight in addition to 4.07 a)
b)

** 4.08 First Aid Manual and First Aid Kit
A First Aid Manual and First Aid Kit. The contents and storage of the First Aid Kit shall reflect the likely conditions and duration of the passage, and the number of crew

** 4.09 Foghorn
A foghorn

** 4.10 Radar Reflector
A passive radar reflector with:

** 4.10.1 octahedral circular plates of minimum diameter 30 cm (12"), or
a)
** 4.10.1 octahedral rectangular plates of minimum diagonal dimension 40 cm (16"), or
b)
** 4.10.1 a non-octahedral reflector with a documented Root Mean Square minimum Radar Cross Section (RCS) area of 2 m² (22 ft²) from 0-360° of azimuth and ±20° of heel

** 4.11 Navigation Equipment
Navigational charts (not solely electronic), light list and chart plotting equipment

** 4.12 Safety Equipment Location Chart
A safety equipment location diagram in durable waterproof material, clearly displayed in the main accommodation, marked with the location of principal items of safety equipment

** 4.13 Depth, Speed and Distance Instruments
MoMu0,1,2,3 4.13.1 A knotmeter or distance measuring instrument (log)
MoMu,1,2,3,4 4.13.2 A depth sounder

** 4.14 Spare Number

** 4.15 Emergency Steering
MoMu0,1,2,3 4.15.1 An emergency tiller capable of being fitted to the rudder stock except when
MoMu0,1,2,3 4.15.1 the principal method of steering is by means of an unbreakable metal tiller
a)
MoMu0,1,2,3 4.15.1 there are two methods (e.g. tillers, wheels) of controlling a rudder, neither of which shares components with the other except for the rudder stock.
b)
MoMu0,1,2,3 4.15.2 A proven method of emergency steering with the rudder disabled

** 4.16 Tools and Spare Parts
4.16.1 Tools and spare parts, suitable for the duration and nature of the passage
4.16.2 An effective means to quickly disconnect or sever the standing rigging from the boat

** 4.17 Boat’s name
The boat’s name on miscellaneous buoyant equipment, such as lifejackets, cushions, lifebuoys, recovery slings, grab bags etc.

** 4.18 Retro-reflective material
4.18 Marine grade retro-reflective material on lifebuoys, recovery slings, liferafts and lifejackets

** 4.19 EPIRBs
MoMu1,2 4.19.1 A water and manually activated 406 MHz EPIRB
MoMu0,1,2 4.19.2 A 406 MHz EPIRB registered after 2015 shall include an internal GPS
MoMu0,1,2 4.19.3 All EPIRBs registered with the appropriate authority associated with the country code in the hexadecimal identification (15 Hex ID) of the beacon. A beacon can be registered online with the Cospas-Sarsat IBRD if the country does not provide a registration facility and the country has allowed direct registration in the IBRD

** 4.20 Liferafts
** 4.20.1 Liferaft Construction
MoMu1,2 4.20.1 One or more inflatable liferafts with a total capacity to accommodate at least the total number of people on board which complies with:
a)
MoMu1,2 4.20.1 SOLAS LSA Code 1997 Chapter IV or later version; or
**4.20.1** ISO 9650-1:2005, Type 1, Group A - Small Craft - Inflatable; or

MoMu1,2

**4.20.1 a)** ii

MoMu1,2

**4.20.1 a)** iii

MoMu1,2

**4.20.1 a)** iv

MoMu0,1,2

**4.20.2 Minimum Liferaft Equipment**

MoMu1,2

**4.20.2 a)** A SOLAS liferaft shall contain as a minimum a SOLAS A pack;

MuMo1

**4.20.2 b)** An ISO 9650 liferaft shall contain as a minimum Pack 1 (greater than 24 hour pack);

MoMu1,2

**4.20.2 d)** The minimum contents of the ISO liferaft equipment packs are listed below. Not all items are necessarily packed within the liferaft. Some items are permitted to be carried within an accompanying waterproof grab bag which shall be in a readily accessible location:

Portable buoyant bailer easily operable by hand

2 sponges

Pair of buoyant paddles with handles (not mitts) tied into raft adjacent to an entrance

Whistle

2 waterproof torches with 6 h duration and

2 spare waterproof torches or 2 spare batteries and bulbs

Signalling mirror

6 anti-seasickness pills per person *

Seasickness bag per person, each with a simple, effective, closure system *

6 hand flares in accordance with SOLAS LSA Code Chapter III, 3.2. 3 may be stowed in the grab bag.

2 red parachute flares in accordance with SOLAS LSA Code Chapter III, 3.1. 1 may be stowed in the grab bag.

Kit to repair leaks in most inflatable compartments, operable in wet conditions and during violent motion

Hand operable air pump, capable of and ready for immediate use to inflate most compartments. Loose parts captive to the pump.

First-Aid Kit including at least 2 tubes of sunscreen. All dressings shall be capable of being effectively used in wet conditions. The first aid kit shall be clearly marked and shall be re-sealable.

2 thermal protective aids in accordance with SOLAS LSA Code Chapter III, 2.5 *

500 ml container of drinking water per person

2 additional 500 ml container of drinking water per person, or desalinator *

10 000 kJ food per person *

* may be packed in grab bag instead of liferaft

4.20.3 Liferaft Packing and Stowage

Each liferaft shall be packed either in:-

a) a rigid container securely stowed on the working deck, in the cockpit or in an open space; or:-

a) i a rigid container or valise securely stowed in a dedicated weather tight locker containing liferaft and abandon ship equipment only which is readily accessible and opens onto the cockpit or working deck, or transom

b) In a boat with primary launch before June 2001, a liferaft may be packed in a valise not exceeding 40 kg securely stowed below deck adjacent to a companionway

c) On a multihull or on a monohull with moveable ballast the liferaft shall be readily deployable whether or not the boat is inverted

d) The end of each liferaft painter should be securely fastened to the boat

e) Each raft shall be capable of being got to the lifelines or launched within 15 seconds

4.20.4 Spare Number

4.20.5 Liferaft Servicing

A liferaft shall be serviced at a manufacturer authorized service station at the following maximum intervals:
** 4.20.5 a) i SOLAS liferafts annually
        a) ii ISO 9650 canister packed liferafts every 3 years
        a) iii ISO 9650 valise packed liferafts every 3 years except that hired liferafts shall be serviced annually
        a) iv ISAF liferafts annually
        a) v ORC liferafts annually

4.20.5 b) Servicing certificates (original or a copy) on board

** 4.21 Grab Bags

** 4.21 f) If a grab bag is provided it shall have inherent flotation, at least 0.1 m$^2$ (1 ft$^2$) area of fluorescent orange colour on the outside, shall be marked with the name of the boat, and shall have a lanyard and clip

** 4.22 Crew Overboard Identification and Recovery

** 4.22.1 Locator Beacons

** 4.22.2 GPS Crew Overboard Position

** 4.22.3 a) a lifebuoy with a self-igniting light, a whistle and a drogue

** 4.22.4 In addition to 4.22.3 above, within reach of the helmsman and ready for immediate use, a second lifebuoy equipped with:

** 4.22.5 At least one lifebuoy shall depend entirely on permanent buoyancy (e.g. foam)

** 4.22.6 Each inflatable lifebuoy and any automatic device shall be tested and serviced at intervals in accordance with its manufacturer's instructions

** 4.22.7 A heaving line, no less than 6 mm (1/4")diameter, 15 - 25 m (50 - 75') long, readily accessible to cockpit

** 4.22.8 A recovery sling which includes a:

** 4.22.9 minimum strength capable to hoist a crewmember aboard

** 4.23 Pyrotechnic and Light Signals

** 4.23 Pyrotechnic signals shall be provided conforming to SOLAS LSA Code Chapter III Visual Signals and not older than the stamped expiry date (if any) or if no expiry date stamped , not older than 4 years.

** 4.24 Spare Number

** 4.25 Cockpit Knife

** 4.25 A strong, sharp knife, sheathed and securely restrained shall be provided readily accessible from the deck or a cockpit.

** 4.26 Storm & Heavy Weather Sails
4.26.1 Design

Figure 3

MoMu1,2

** 4.26.1 The material of the body of a storm sail purchased after 2013 shall have a highly-visible colour (e.g. dayglo pink, orange or yellow)

a) 4.26.1 Aromatic polyamides, carbon and similar fibres shall not be used in a trysail or storm jib but HMPE and similar materials are permitted

b) 4.26.1 Sheeting positions on deck for each storm and heavy-weather sail

c) 4.26.1 Sheeting positions for the trysail independent of the boom

d) 4.26.2 Sail Areas

** 4.26.2 The maximum area of storm and heavy weather sails shall be lesser of the areas below or as specified by the boat designer or sailmaker

MoMu0,1,2,3 4.26.2 A heavy-weather jib (or heavy-weather sail in a boat with no forestay) with:

a) 4.26.2 area of 13.5% height of the foretriangle (IG) squared

MoMu0,1,2 4.26.2 A storm jib with:

b) 4.26.2 area of 5% height of the foretriangle (IG) squared

MoMu0,1,2 4.26.2 maximum luff length 65% of IG

MoMu0,1,2 4.26.2 permanently attached means, independent of a luff groove, to attach to the stay
For sails made after 2011: Storm and heavy weather jib areas calculated as:

\[(0.255 \times \text{luff length} \times (\text{luff perpendicular} + 2 \times \text{half width}))\]

A storm trysail with:

d) area not greater than 17.5% mainsail hoist (P) x mainsail foot length (E)

d) i) if manufactured before 2011 comply with ISO 12402 - 3 (Level 150) or equivalent, including EN 396 or UL 1180 and:

a) have crotch/thigh straps (ride up prevention system (RUPS))

b) if manufactured after 2011 comply with ISO 12402-3 (Level 150) and be fitted with a whistle, lifting loop, reflective material automatic/manual gas inflation system

SECTION 5 - PERSONAL EQUIPMENT

Each crew member shall have:

** 5.01 Lifejacket

** 5.01.1 A lifejacket which shall:

** 5.01.1 if manufactured before 2012 comply with ISO 12402 - 3 (Level 150) or equivalent, including EN 396 or UL 1180 and:

** 5.01.1 if inflatable have a gas inflation system

a) have crotch/thigh straps (ride up prevention system (RUPS))

b) have an integral safety harness in compliance with OSR 5.02

** 5.01.1 if manufactured after 2011 comply with ISO 12402-3 (Level 150) and be fitted with a whistle, lifting loop, reflective material automatic/manual gas inflation system

** 5.01.1 crotch/thigh straps (ride up prevention system (RUPS))

MoMu0,1,2 5.01.1 have an emergency position indicating light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3

** 5.01.1 be clearly marked with the boat’s or wearer’s name

MoMu0,1,2 MoMu0,1,2,3 5.01.1 have a sprayhood in accordance with ISO 12402-8

Sail Inventory

Spare Number

Emergency Pumps

Deck Bags

4.29

Emergency Pumps

4.30 either fixed or portable pump to remove ingress water from any compartment. This pump shall:

4.30.1 have a minimum rated capacity of 200 l/min

4.30.1 be operated by battery, main engine powered or a separate engine

4.30.1 if portable electric-powered, power cables to be terminated with alligator clips

4.30.1 have sufficient hose to discharge directly overboard or into the cockpit.

4.30.1 A combination of permanently installed and portable pumps may be combined to meet the above requirement.
5.01 Lifejackets

5.01.1 If inflatable, regularly checked for air retention.

5.01.2 A boat shall carry at least one gas inflatable lifejacket spare cylinder and, if appropriate, spare activation head for each type of lifejacket on board.

5.01.3 A boat shall carry at least one spare lifejacket as required in OSR 5.01.1, (a spare PLB described in 5.01.1(e) is not required)

5.01.4 The person in charge shall personally check each lifejacket at least once annually.

5.02 Safety Harness and Tethers

5.02.1 A harness that complies with ISO 12401 or equivalent

5.02.2 A tether that shall:

5.02.2(a) comply with ISO 12401 or equivalent
5.02.2(b) not exceed 2 m (6'-6") including the length of the hooks
5.02.2(c) have self-closing hooks
5.02.2(d) have overload indicator flag embedded in the stitching
5.02.2(e) be manufactured after 2000

5.02.3 All of the crew shall have either:

5.02.3(a) a tether not exceeding 1m(3'3") including the length of the hooks, or
5.02.3(b) an intermediate self-closing hook on a 2 m (6'-6") tether

5.02.5 A tether which has been overloaded shall be replaced

5.07 Survival Equipment

5.08 Diving Equipment

SECTION 6 - TRAINING

6.01 Training

6.01.2 At least 30% but not fewer than two members of a crew, including the Person in Charge shall have undertaken training within the five years before the start of the race in OSR 6.02 Training Topics

6.01.4 Except as otherwise provided in the Notice of Race, an in-date certificate gained at a World Sailing / ISAF Approved Offshore Personal Survival Training course shall be accepted by a race organizing authority as evidence of compliance with Special Regulation 6.01. See Appendix G - Model Training Course, for further details.

6.02 Training Topics

6.02.1 Giving Assistance to Other Craft
6.02.2 Personal Safety Gear, theory and practice
6.02.3 Care and Maintenance of Safety Gear
6.02.4 Fire Precautions and Firefighting, theory and practical
6.02.5 Crew Overboard Identification and Recovery
6.02.6 Hypothermia, Cold Shock and Drowning
6.02.7 Crew Health
6.02.8 Marine Weather
6.02.9 Heavy Weather
6.02.10 Storm Sails
6.02.11 Damage Control
6.02.12 Search and Rescue Organization
6.02.13 Pyrotechnics and Signalling Gear, theory and practical
6.02.14 Emergency Communications, theory and practical
6.02.15 Liferafts and Abandon Ship, theory and practical

6.03 Spare Number

6.04 Routine Training On-Board

6.04 At least annually the crews shall practice the drills for:

6.04 a) Crew-Overboard Recovery
6.04 b) Abandonment of vessel

6.05 Medical Training
At least two crewmembers shall have a valid first aid certificate completed within the last five years meeting:

a) A certificate listed on the World Sailing website www.sailing.org/specialregs of MNA recognised courses

b) STCW First Aid Training complying with A-VI/1-3 - Elementary First Aid or higher STCW level

6.06 Diving Training

APPENDICES TO SPECIAL REGULATIONS

Appendix A - Moveable and Variable Ballast
Appendix B - For Inshore Racing
Appendix C - For Inshore Dinghy Racing
Appendix D - A guide to ISO and other Standards
Appendix E - World Sailing Code for the organisation of Oceanic Races
Appendix F - Standard Inspection Card
Appendix G - Model Training Course
Appendix H - Model First Aid Training Course
Appendix J - Hypothermia
Appendix K - Drogues and sea anchors
